Introduction

Basis for the Issuer's liability to disclose information in the form of Quarterly Report

The Issuer's security prospectus was registered. Commercial papers of the Issuer were admitted to the trading on the stock exchange

On March 27, 2008 Russian Federal Service on Financial Markets registered the Prospectus of Open Joint-Stock Company "Interregional Distributive Grid Company of Urals" (registration numbers 4-01-32501-D, 4-02-32501-D)

The present quarterly report contains evaluations and forecasts of the Issuer's executive bodies with regard to future events and/or actions, industry development perspectives as well as its operation results, including the Issuer's plans, probability of certain events and actions. Investors should not full rely on evaluations and forecasts provided by the Issuer's executive bodies, since real future operating results may differ from forecasted ones due to many reasons. Purchasing the Issuer's securities may be risky, as is described by the quarterly report.

- *Not to be under the conditions (with regard to the Company and SACs of IDGC Holding, OAO), stated in item 1, article 12, Federal Law "On audit activities. The Issuer's auditor makes inspections of financial and operating activities of the Issuer in accordance with the requirements set forth by the Russian legislation on the basis of agreement concluded with the auditor.*

Procedure of nominating auditor candidate for approval by shareholder meeting, including managing body taking the following decision:

Following the auditor competitive selection the Issuer's BoD recommends the corresponding auditor candidate to shareholder meeting for approval.

Information on services rendered within special auditor assignments:

There were no special auditor assignments.

Remuneration determination procedure, actual amount of remunerations paid to the auditor at the end of completed financial year when the auditor audited the Issuer's financials:

According to the Charter the amount of remunerations paid to the auditor is determined by the BoD. The price and terms of payment are stipulated in the contract concluded between the Company and auditor. in 2Q 2012 there were no remuneration paid to the auditor.

Information on deferred and overdue payments for the services rendered by the Auditor:

There are no deferred and overdue payments for the auditor services.

Potential factors that can challenge the auditor's independency, including information on significant interest between the auditor (the auditor's officers) and the issuer (the issuer's officers):

- *the auditor's (or its officers) share in the charter capital of the issuer: none;*
- *money borrowed by the auditor (its officers) from the issuer: none;*
- *close business contacts (participation in promotion of the issuer's services or joint business, etc.) as well as kinship: none;*
- *the issuer's officers are simultaneously the auditor's officers: none..*

Measures taken by the issuer and the auditor to eliminate the factors:

The issuer and the auditor interacted within the current legislation, in particular, according to Federal Law #119-FZ dd. 07.08.2001 on the Auditor's activities. According to its art. 12, the audit cannot be performed by:

- 1) auditors being the founders (stockholders) of the audited entities, their directors, accountants and other persons responsible for accounting and financials administration;
- 2) auditors with a close kinship (parents, spouses, brothers, sisters, children as well as brothers, sisters, parents and children of the spouses) with the founders (stockholders) of the audited entities, their officers, accountants and other persons responsible for accounting and financials administration;
- 3) auditor companies, with directors and other officers being the founders (stockholders) of the audited entities, their officers, accountants and other persons responsible for accounting and financials administration;
- 4) auditor companies, with directors and other officers being in a close kinship (parents, spouses, brothers, sisters, children as well as brothers, sisters, parents and children of the spouses) with the founders (stockholders) of the audited entities, their officers, accountants and other persons responsible for accounting and financials administration;
- 5) auditor companies in relation to audited entities being their founders (stockholders); in relation to audited entities, with the auditor companies being the founders (stockholders); in relation to subsidiaries, branches and representative offices of the audited entities as well as in relation to companies possessing the same founders (stockholders) as the auditor company;
- 6) auditor companies and individual auditors, rendering services on accounting recovery and administration as well as financials administration for natural persons and legal entities (in relation to these persons) during three years prior to the audit.

The basic measure taken by the issuer to decrease mutual dependency is a thorough review of an auditor candidate with a view to the auditor's independency. The auditor is completely independent from the issuer's managing bodies in accordance with art.12 of the Federal Law on the auditor's activities; the auditor remuneration did not depend on the auditor results.

1.4. Information on the Issuer's appraisers

There were no changes of the item during the reported period

1.5. Information on the Issuer's advisors

There were no advisors engaged under the reasons stipulated by the item during 12 months since the end of the reported period

2.3.2. Credit history of the Issuer

Discharge of the issuer's liabilities on credit and/or loan contracts during the last completed financial year and current financial year, including contracts concluded by bond issue and sale, principal debt totaling 5% and more of book asset value as of the end of the last completed reported period (quarter, year) preceding the conclusion of a contract, regarding which the set term for financial statement dissemination has expired as well as other credit and/or loan contracts the issuer considers significant.

The Issuer had no such liabilities. As of 1H 2012 debt increased by RUR 1 161.8 mln and, as of 30.06.2012, it totaled RUR 7 192.8 mln. At the same time the Issuer has no credit contracts with principal debt exceeding 5% of book asset value. The obligations on each contract are discharged on time, the quality of debt servicing is high. As of the end of 1H 2012 the Company has 12 current credit contracts.

2.3.3. Liabilities of the Issuer from the coverage provided to third parties

There are no such liabilities

2.3.4. Other liabilities of the Issuer

There are no other liabilities unreported in the balance sheet and which can significantly affect the Issuer's financial status, its liquidity, financing resources and terms of their usage, performance results and expense

2.4. Risks related to the purchase of placed securities

Risk management policy of the Issuer:

The activities of OAO "IDGC of Urals" are affected by a range of factors that are beyond the Company's control. Many of the risk factors described below are of macroeconomic character and typical for any company. Certain business segments are subjects to certain risk factors. Risks in energy transmission services, to certain extent, derive from the risks in the wholesale and retail energy markets. These developing markets, in their turn, are more risky than developed markets (dealing with other products and services) and include significant legal, economic and political risks. Political risks have a small contribution to overall risks. Dynamic development of the wholesale and retail energy markets enable us to suppose that the given information can quickly become outdated. The current information uncertainty, caused by the dynamism of the factors, can influence the Company's future activities, possibility for asset sale and observance of maturity dates. Besides, several risks which are not currently significant can become economically viable in future.

Internal control system is designed to monitor and timely prevent internal and external risks influencing strategic and operating goals of the Company. The Company permanently works hard to reveal events potentially influencing any aspect of the Company's operations, to appraise and control possible negative consequences or appearing possibilities of such consequences, to take efficient measures to minimize or liquidate the risks as well as, if required, improvement of results shown by the chosen strategy.

The key aims on internal control system are:

1. Improvement of corporate governance system to ensure rational assurance in observation of interests and rights of shareholders and investors (efficient and successful resource usage, asset preservation, compliance control as well as authenticity and objectivity of management and financial reporting and reliability of its preparation).

2. Increase of efficiency and effectiveness of activities related to the implementation of the development strategy of the Company using risk management system and efficient control procedures.

3. Facilitation of timely adaptation of the Company to changes in external and internal environment.

Performance principles, processes and procedures of Internal control and risk management system (hereinafter referred to as ICRMS) of IDGC of Urals are regulated by Risk Management Policy of IDGC of Urals, OAO (approved by the BoD resolution, protocol #70 dd. 04.06.2010) and Internal Control Policy of IDGC of Urals, OAO (approved by the BoD resolution, protocol #70 dd. 04.06.2010).

To support the documents the following regulations were approved:

- The Regulations on Control Environment and Risks of Business Process – Commercial Metering and Transmission Sales (approved by the BoD resolution, protocol #85 dd. 01.06.2011).

- The Regulations on Control Environment and Risks of Business Process – Exploitation (approved by the BoD resolution, protocol #85 dd. 01.06.2011).

- The Regulations on Control Environment and Risks of Business Process – Purchase Management (approved by the BoD resolution, protocol #85 dd. 01.06.2011).

- The Regulations on Control Environment and Risks of Business Process – Connection sales (approved by the BoD resolution, protocol #89 dd. 05.08.2011).

Besides, Decree #229 dd. 26.07.2011 approved the Methodic recommendations on risk management to determine approaches and methods for risk discovering, evaluation and minimization on all governance levels.

Decisions on risk management taken by our top managers are in compliance with the current Russian legislation and provide good balance between positive effect from decisions and expenses caused by implementing them. . Implementing decisions on risk management we constantly analyze their practical effectiveness.

Main RM methods include:

1. Insurance for property, industrial objects and transport, civil liability, medical insurance, etc.;

2. Diversity in retail market with a view to allocate consumers in total volume of services;

3. Evading unreliable contractors;

4. Diversity in purchase of materials, equipment, services to reduce the Company's dependence on certain contractors;

5. Evading investment projects with a potentially high risk level.

2.4.1. Industry risks

Energy transmission using networks as well as technological connections to networks are state-regulated activities. Therefore, regulators' approval of the tariffs on our services directly influences the gained revenues. This causes the following risks:

- Approved tariffs are lower than economically viable levels;

- Revenues reduction due to changes in real structure of energy transmission in comparison to the one used while approving tariffs;

- Appearance of extra expenses related to cross-subsidization which disable the Company to set economically viable tariffs;
 - Risks related to alterations in pricing legislation on electric and power energy on retail markets.
- The RAB tariff methodology additionally creates the following risks:
- Disagreement with regulating authorities over evaluation results of initial investment base done by independent valuers;
 - Approval of yield rate at the level below economically viable and, as a result, problems with borrowed resources for investment financing.

Our key business lines are energy transmission and connection that are regulated by the state. To keep tariffs for end users the state imposes restrictions on the growth of a regulated tariff element, and this is a disadvantage for IDGC of Urals, OAO. The risk appeared in 1Q 2011 as a result of Government Decree #1172 dd. 27.12.2010. According to the Decree average boiler tariff growth for energy transmission for 2011 shall not exceed 15% on the previous year. IDGC of Urals constantly works hard over economic grounding for tariff-included expenses as well as controls own expenses and tariff completion. We prepare and submit justifying materials and information to regional regulators as well as work out and approve long-term development programs. Strengthening of responsibility for grounding of expenses included into RGR and adoption of maximum possible RGR by the regulators are main measures to manage the risks.

Transition to RAB is aimed at cutting down the influence of state tariff regulation on the Company's operations. Permenergo branch is one of the pilot projects that transited to RAB in 2008. Other branches transited to RAB regulation during 2011. However, the transition has led to the risk factors related to non-fulfillment of such long-term RAB parameters as rate of return and internal rate of return. To minimize the factors the Company implements cost-cutting programs and plans its activities according to approved tariffs.

It is not inconceivable that under restricted growth of end-user and network rates local regulator may approve considerable revenue growth for several gridcos by cutting down (or retaining) revenues of IDGC of Urals in favor of other gridcos. Key directions for risk minimization are submission of justifying materials to the local regulators that prove the necessity of expense increase not less than average network tariff growth as well as cooperation with local regulator on firm position with regard to required advanced growth of expenses since the Company is a strategic regional company.

The Company's measures to manage the risks:

- Cooperation with Federal Tariff Service and regional regulators on economic feasibility of expenses included into tariffs as well as on changing Russian pricing legislation with taking into account disco's interests in setting energy tariffs on retail markets;
- Elaboration and integration of long-term region development programs (in the Company's service area) as well as signing agreements with regional and local authorities which stipulate investment resource volumes;
- Reduction of the Company's expenses;
- Gradual transition to RAB tariff model which will enable to secure long-term investments into grids as well as to decrease the influence of subjective factors onto tariff decisions.

Equipment unsatisfactory conditions due to its depreciation are the reason for operational risks main of which are:

- Deterioration of operating and economic equipment indicators;
- Unfavorable ecological consequences;
- Danger of accidents with partial or full energy shortage ending in unfavorable social consequences;
- Risk of personnel industrial injuries;
- Danger of chronic accidents.

The realization of the risks can lead to accidents (equipment breakdown) and construction destruction. Chronic accidents can lead to network separation, consumer rolling blackouts, equipment critical operations.

The Company's measures to manage the risks:

The possibility of equipment breakdown is on average level; to prevent this we take measures for provision of equipment and construction reliability at the appropriate level, namely:

- Repair programs are 100% fulfilled;
- Modern diagnostics methods (with equipment operating nonstop) are implemented;
- Structure and volumes of spare parts are constantly optimized;
- To increase quality of services and materials, responsibility of contractors and decrease of unit costs tender selection of service and supplier companies is introduced;
- To ensure equipment reliability emergency control systems are implemented and upgraded in compliance with modern requirements.

Risk management in observing industrial safety requirements within the frameworks of operating risk management is ensured by observing federal legislation on industrial safety and operating control system (designed on its base) over observing industrial safety requirements in OAO "IDGC of Urals".

Ecological risks, which represent possible transformer oil leakages (with no oil receivers mounted on the substations) into rivers and lakes that may lead to oil pollution on fishing grounds. As a result of infringes of nature-protection legislation high fines may be imposed on the Company.

The Company's measures to manage the risks:

To reduce ecological risks we implement the Program for Ecology Policy Integration, in compliance with which the Company focuses on three aspects: air protection, water and soil management. Within the frameworks of activities stipulated in long-range program for technical reconstruction and update, the Company substitutes old parts of equipment for new modern ones which ensure high ecological safety. To further improvement of nature-protection activities we implement ecology management system (in compliance with ISO-14001-2004).

Risk of uncertainty on ultimate volumes of energy transmission

The essence of the risk is the lack of economic development plans, including indication of energy consumption increase, in several Russian regions and cities. These circumstances make it impossible to accurately forecast branch investments which could satisfy growing demand for energy in mid- and long-term perspective. This risk mainly affects fulfillment of obligations on energy transmission.

The Company's measures to manage the risks:

The risk is minimized within the frameworks of united sales department of OAO "IDGC of Urals" by the following measures:

- Cooperation with regional and municipal authorities on elaboration of regional economic development plans in mid- and long-term perspective;*
- Justification of energy transmission tariff with investment component focused on equipment transfer capacity increase in state tariff regulators.*

Besides, the uncertainty is related to uncertainty of recession ending.

Risks related to possible price change on materials, spare parts and services

There are no risks related to service price change on foreign markets since OAO "IDGC of Urals" does not provide energy transmission services outside Russia. We also do not buy spare parts and equipment abroad. On Russian market the risk of possible price change, primarily decrease, is viewed as unlikely.

The Company's measures to manage the risks:

These risks can be minimized by the following:

- Increase of operating effectiveness based on operating expenses decrease programs (creation of competitive environment in purchase of services, optimization of repair and capital investment expenses, etc.);*
- Well-balanced financial policy.*

Taking into account the above-mentioned, we consider that possible deterioration of situation in the industry as well as negative changes in the grids operating and development process are able to affect the Company's activities but they should not considerably influence its liability fulfillment.

2.4.2. Federal and regional risks

IDGC of Urals, OAO operates in Russia and this explains the dependence of its results on social economic situation in the country. Risks related to social economical and political processes in Russia are beyond the Company's control. Russian economy is only partially protected from market recessions and delays in economic development in other countries. Financial problems and escalated perception of investment risks in developing countries during financial crisis decreased the volume of foreign investments and had a negative impact on Russian economy. Besides, since Russia produces and exports large volumes of gas and oil, Russian economy is oil and gas price-sensitive, oil price reduction in crisis already considerably slowed Russian economy development. Crisis in economy has limited the access of the majority of economic entities, including IDGC of Urals, OAO, to debt capital markets as well as had a negative influence on purchasing power of our consumers.

In December, 2009 rating agency "Standard and Poor's" reviewed its outlook from Negative to Stable regarding ratings of the Russian Federation as well as approved long- and short-term rating in foreign currency at "BBB/A-3", long- and short-term rating in notional currency at "BBB+/A-2". Decrease of Russian sovereign rating based on evaluations, provided by international rating agencies - Standard and Poor's, Fitch, Moody's - has a negative impact on the national and regional economy. Besides, decrease in sovereign credit rating, as a rule, causes decrease in credit rating of financial institutions operating in Russia and this has a negative effect on various economy sectors and directly increases risks for many economic entities, including IDGC of Urals, OAO. We cannot have a direct impact on increase of the Russian credit rating. However, we suppose that the decrease of the sovereign rating will not strongly affect our activities. It is also noteworthy that the company has a positive public credit history (successful redemption of our 2 bond issues in 2008 and 2009 according to public offers) and repays its obligations to banks on a regular basis.

Regional risks in our operations mainly appear when a regional tariff regulator ignores parts of economically viable expenses submitted by us to be included into corresponding tariff. This circumstance can have a significant impact on the Company's investment program. We forecast no negative political changes in our service area that can negatively affect our activities and economic state.

The Company's measures to manage the risks:

Majority of these risks are beyond our control due to the scale. If in Russia or a certain region the political and economical situation, which can negatively affect our operations, destabilizes, the Company will take anti-recessionary measures to decrease negative effect as much as possible, including the following:

- Decrease and optimization of operating costs and other expenses;*
- Investment plan reduction;*
- Decrease in financing operating activities by loans and borrowings;*
- Well-balanced financial policy.*

IDGC of Urals, OAO constantly interacts with federal institutions and other interested parties to reduce the effect made by the risks. Risks of regional geographical peculiarities, including disaster danger, possible transportation termination due to remoteness and/or inaccessibility do not have a significant impact on the Company's operations, since the service area largely is not subject to the mentioned risks. Risks of disaster danger are viewed by the Company as minimal. Possibility of armed conflicts and national or regional emergency is insignificant. In case of possible armed conflicts, the Company may be under the risk of asset damage. The risks, including those with unplanned expenses to mitigate the consequences, are covered by insurance for the majority of the Company's fixed assets.

2.4.3. Financial risks

Financial risk of a company is a probability of unfavorable financial consequences in the form of revenue and capital losses during uncertainties of financial operations. IDGC of Urals, OAO as any economic entity, is subject to key financial risks: inflation; interest; risk of decrease of financial stability; risk of insolvency; investment risk, etc.

Key risks that may for sure affect the financial status of a company are: risk of decreased financial stability and risk of changes interest rates. To decrease the probability of such risks and minimize financial losses if risks occur, IDGC of Urals, OAO undertakes the following:

- it forms stable cash flow covering operating, investment and financial expenses;*
- it manages receivables and payables;*
- it optimizes expenses;*
- it maintains debt at a comfortable level.*

Inflation impact. Inflation level directly depends upon political and economic situation in the country.

Negative influence of inflation on financial and economic operations lies in:

- loss of real receivables if payment is delayed or significantly postponed;*
- increase of costs for transmission service and other services that was not calculated in the tariff;*
- increase of costs in investment construction.*

Critical value of inflation, in the issuer's opinion: planned tempo of inflation decrease stipulated by the Russian Government is achieved. Nevertheless, the issuer, in case inflation increases, plans to increase the turnover rate of working assets by changes in contract relations with consumers. In the issuer's opinion, inflation value that may cause problems for the Issuer is no less than 30% per year.

Measures taken by IDGC of Urals, OAO to decrease inflation risk:

If inflation exceeds the critical values, the issuer plans to increase the share of short-term financial instruments, take measures to decrease implicit costs and maximize tariff growth within normative values. Nevertheless, IDGC of Urals, OAO deems the probability of high inflation in mid-term perspective as a very low one, since the Russian Government and Central Bank profess to carry out anti-inflation policy.

2.4.4. Legal risks

Since the Issuer operates in Russia and does not export goods and services, the issuer can face the risks that appear during domestic operation. This is typical for majority of businesses operating in Russia.

There exist legal risks, particularly, related to controversial interpretation of legal norms which can lead to incorrect taxation and tax payments. To reduce the risks the issuer's accounting department alongside with the legal department constantly improve tax base methodology and control over compliance with the current legislation. Besides, there exist risks of losses related to legislation changes as well as incorrect legal document preparation and activities accompaniment. To minimize the risks all operations undergo an obligatory preliminary legal expertise.

The issuer (as well as all joint-stock companies operating in Russia) can face the risk of legislation changes (federal laws and subordinate legislation) regulating shareholder and corporate relations. IDGC of Urals, OAO, as an issuer, is subject to the risks of shareholders' appeal of major and interested parties transactions (when such transactions are concluded without proper preliminary BoD or AGM approval as well as those approved with violation of the stipulated order).

To minimize the risks the Company has an obligatory preliminary legal analysis of transactions with a view to find reasons for preliminary corporate procedures stipulated by the legislation in force and/or the Charter. In case of necessity such transactions are submitted for review by the competent management bodies of IDGC of Urals, OAO.

Shareholder relations risks include the register risks, "greenmail" risks, risks of non-friendly shareholder activities aimed at putting AGM in jeopardy.

To minimize the risks the company has a contract for share register administration services with professional registrar (working on the Russian stock market since 1990-s) which traditionally occupies top lines in registrar ratings (including "reliability" criteria). The Company also takes measures aimed at shareholder relations (information disclosure in the order stipulated in normative legal documents as well as meetings between the Company's management and shareholders aimed at explanation of current operating issues in the Company's activities).

Risks related to changes in currency legislation. Risks related to changes in currency legislation and control almost will not affect our operations, since we do not plan to operate outside Russia. Our services are nominated in RUR and payments cannot be referred to payments to foreign suppliers.

Risks related to changes in tax legislation

Like any other company the issuer is a taxpayer. Currently tax relations in Russia are regulated by the Russian Tax Code, a range of federal laws adopted in compliance with the Russian Tax Code, laws of Russian subjects as well as subordinate legislation of local authorities. The corresponding normative legal acts often have obscure wording or terms with no precise legal definition. Russian Ministry for Finance and Federal Tax Service authorized to provide official explanations of tax legislation, often give explanations and comments which contradict both tax legislation norms and relevant legal practice. Fiscal bodies are guided by the acts and documents of the mentioned state bodies which are aimed solely at refilling budgets on different levels, moreover, often doing violence to rights and legal interests of taxpayer. Preparation and submission of tax reports alongside with other elements of tax relation regulation system are the competence of, primarily, tax institutions which enjoy the right to additional tax, levies and fine assessment. As a result, tax risks in Russia are considerably higher than tax risks typical for countries with developed market economy and tax system. Tax risk may include: possibility of new taxes and levies; possibility of current tax rate increase; tax base extension, changes in terms and order of tax payments and reporting.

The most significant tax risk for IDGC of Urals, OAO is the risk of tax rate increase.

Our management considers that the Company fully observes tax legislation in terms of its operations, but still this do not eliminate potential tax risks in case of changes in state fiscal policy in relation to certain taxes and levies as well as changes (not for taxpayer benefit) in court practice on certain tax cases. Changes in tax legislation as of 2Q 2011 do not significantly affect the issuer's financial interest. There are the following changes:

- procedure of acknowledging R&D expenses,

- procedure of acknowledging expenses related to acquisition of rights to use personal computers (Federal Law #132-FZ dd. 07.06.2011)

The Issuer plans its further operations taking into account the changes.

Risks related to changes in customs control regulations and duties. At the present moment and during the reported period the Issuer has not dealt with operations regulated by customs and currency control legislation. Therefore, changes in customs control regulations and duties are not a significant legal risk for us.

Risks related to changes of requirements in licensing of the Issuer's operations or of rights to use circulation-limited objects. Reasons, conditions and procedure for licensing are regulated by Federal Law #128-FZ dd. 08.08.2001 "On Licensing Several Activities". Our primary operations - energy transmission and connection - are not subject to licensing according to the Russian legislation. During 1Q 2010 changes to the above-mentioned law did not affect our current operations, since it did not deal with our operations. In case of changes/ raised demand to obtain a license, we'll take the required measures and obtain licenses and permissions.

Risks related to changes in energy legislation.

FST Decree #365-e5 dd. 30.11.2010 approved the Methodic Guidelines on the determination of retail connection prices. These Guidelines regulate connection fees (up to 35 kV voltage level, up to 10000 kVA capacity level and less than 35 kV and 10000 kVA capacity level) as well as connection fees based on standardized tariffs.

New Guidelines stipulate the procedure for individual connection fees, including the coordination procedure among applicants, gridcos and authorized executive body as well as contain a new section stipulating the determination of expenses spent on grid construction (from grids to connected equipment and/or energy objects included into connection fee.

Government Decree # 1242 dd. 31.12.2010 stipulates changes to Government decree on retail market functioning into the Fundamentals of energy pricing approved by Government Decree #109 dd. 26.02.2004, Government Decree #530 dd. 31.08.2006 on the approval of rules regulating retail market functioning during the transition period", which specify the procedure for regulated tariff determination and choice. They also stipulate the specificity of energy producer (supplier) participation in retail purchase and sale, including commissioning of generation objects that produce energy and commissioning of connected equipment.

Risks related to changes in court practice on issues related to the issuer's operations (including licensing) can have a negative impact on results of such operations as well as results of the current issuer's lawsuits. The issuer's activities are subject to risks related to the legal system in Russia. These risks include, particularly, possible contradictions between the Russian legislation and legal acts of local executive bodies and local regional authorities as well as lack of court practice on applying several legal acts.

In case of introducing changes into court practice on issues related to the issuer's activities, the issuer shall plan to its financial and operating activities according to these changes. Since the Issuer does not plan to operate on external markets, we do not analyze the effect of legal risks related to the Issuer operations on external markets.

2.4.5. Risks related to the Issuer's operations

Risks related to the current lawsuits in which the Issuer participates.

At present the Issuer participates in a range of lawsuits. There may be possible negative impacts on the Issuer's financial and operating performance due to pronouncement of judgment to the disfavor of the Issuer. The most significant lawsuits, according to the Issuer's opinion, are disclosed in item 7.7.

Risks related to a possible loss of customers contributing no less than 10% of overall revenues.

Main business line of the Issuer is provision of services on energy transmission and technological connection to electric networks being monopolistic activities. Taking this into account, the risk related to a possible loss of consumers contributing no less than 10% of overall revenues is viewed by the Issuer as non-significant.

Risks related to a possible failure to prolong a license for certain operations or usage of circulation-limited objects (including natural resources).

In accordance with Federal Law #128-FZ dd. 08.08.2001 "On licensing certain operations" there is no licensing for main business lines of the Issuer.

Risks related to the Issuer's liability for third parties' debts, including SACs.

At present there are no such liabilities. The risk is viewed by the Issuer as non-significant.

Other risks related to the Issuer's activities:

Risks related to activities of third parties:

Fulfilling its contract liabilities the Issuer is exposed to risks related to activities of third parties. Besides, risks related to activities of third parties occur when wires are stolen.

Compliance risks

Violations of terms for connection and for requesting the amount of connection fee from a regulator are factors of risks related to bringing to responsibility for violating antimonopoly legislation with regard to connection. To minimize the risks all our branches use software enabling to control terms of execution of connection requests and local regulating documents determining activities performed during the arrangement of connection procedure.

Breaks and failures of head-end and network equipment, information system, data transmission channels are IT-related risk factors. To minimize the risks we perform scheduled-preventive maintenance, create reserve channels, upgrade computing capacities, network and technological equipment.

Key factors for risks related to corporate governance are non-transparency of ownership structure, conflicts between various shareholder groups, relations between shareholders and management, conflict of interests between management and shareholders, low corporate culture. Main activities focused on the risk mitigation are close-cut distribution of authority and responsibility between the BoD and executive bodies, determination of the strategy and tasks of the Company, observation of shareholder interests, control of the Audit Commission, subdivision responsible for internal audit and risk management and external auditor.

Untimely registration (re-registration) of land plots and title of ownership, untimely changes of real boundaries of the plots, low-quality contractor operations are factors of risks related to property management. Permanent monitoring of contractor operations, timely submission of documents to local authorities, control over title document custody are main measures taken by IDGC of Urals on risk reduction.

Tax risks are generic for IDGC of Urals and any other company operating in Russia. Primarily, tax risks are caused by the specificity of the current legislation, its changes, equivocating interpretation of regulatory documents, contradictory court sentences on similar cases. Nevertheless, these risk factors are not significant for IDGC of Urals, OAO. Permanent monitoring of changes in legislation and court practice enables us to plan our financial and economic operations with regard to changes. Accounting and legal departments work hand in hand over methodology of tax base calculation and control their compliance with the current legislation. There is also a preliminary legal expertise of corporate procedures, operations and transactions of the Company. Company thinks that the risk is insignificant.

III. Detailed information on the Issuer

3.1. The history of creation and development of the Issuer

3.1.1. Name of the Issuer

Full name of the Issuer: *Open Joint-stock Company Interregional Distributive Grid Company of Urals*

Date when the full company name was introduced: *14.08.2007*

Short name of the Issuer: *IDGC of Urals, OAO*

Date when the short company name was introduced: *14.08.2007*

Full or short name of the Issuer is similar to the following legal entities

Open Joint-Stock Company Interregional Distributive Grid Company of Siberia (IDGC of Siberia, OAO);

Open Joint-Stock Company Interregional Distributive Grid Company of Volga (IDGC of Volga, OAO);

Open Joint-Stock Company Interregional Distributive Grid Company of Center (IDGC of Center, OAO);

Open Joint-Stock Company Interregional Distributive Grid Company of Center and Volga (IDGC of Center and Volga, OAO);

Open Joint-Stock Company Interregional Distributive Grid Company of South (IDGC of South, OAO);

Open Joint-Stock Company Interregional Distributive Grid Company of North Caucasus (IDGC of North Caucasus, OAO);

Open Joint-Stock Company Interregional Distributive Grid Company of North West (IDGC of North West, OAO).

Explanations required to evade confusing the company names:

To escape confusing the company names a special attention should be paid to the last word in full and short company name indicating service area – Siberia, Center, Volga, South, North Caucasus, Center and Volga, North West.

All preceding names of the Issuer

Full name: *Open Joint-Stock Company Interregional Distributive Grid Company of Urals and Volga*

Short name: *IDGC of Urals and Volga, OAO*

Date of naming: *28.02.2005*

Basis for naming: *Decree of RAO UES MB Chairperson #28r dd. 24.02.2005 28p on the establishment of IDGC of Urals and Volga (state registration certificate dd. 28.02.2005 #002017106 series 66).*

3.1.2. State registration of the Issuer

PSRN: *1056604000970*

Registration date: *28.02.2005*

Registering authority: *Tax Inspection of the Russian Federal Tax Services, Leninskyi rayon, Ekaterinburg*

3.1.3. Creation and development of the Issuer

The Issuer is created for the time being

Short description of the Issuer's creation and development. Aims and mission of the Issuer (if exists) and other information on the Issuer's operations significant for decision-taking on purchasing the Issuer's securities:

Open joint-stock company Interregional Distributive Grid Company of Urals was incorporated on February 28, 2005 in Ekaterinburg (the Urals) in the course of the Russian energy sector reforms following differentiation of companies which produce, transfer, distribute and sale electric and heat energy as well as operating dispatcher management into separate business units.

Main variant of the Russian distributive grid complex reform supposed the creation of interregional distributive grid companies (IDGCs) as well as interregional integration of regional distributive companies in IDGCs within the united energy systems.

According to the first IDGCs configuration, with a view to effective operation, development and reliability of the distributive complex within the united energy systems of the Urals and Middle Volga, the company included (till August 2007 our Company name was IDGC of Urals and Volga, OAO) 15 DGCs - regional discos: Kirovenergo, OAO, Kurganenergo, OAO, Marienergo, OAO, Mordovenergo, OAO, Orenburgenergo OAO, Permenergo, OAO, Penzaenergo, OAO, Samara distributive company, OAO, Saratov distributive company, OAO, Sverdlovengero, OAO, Tyumenenergo, OAO, Udmurtenergo, OAO, Ulyanovsk distributive company OAO, Chelyabenergo OAO and Chuvashenergo.

The second IDGC configuration was formed in compliance with territorial contingency and corresponding balance cost of DGC's assets which comprised the corresponding IDGCs. According to the configuration IDGC of Urals, OAO included: Sverdlovengero, OAO, Chelyabenergo OAO, Permenergo, OAO and Kurganenergo, OAO.

In August 2007 due to the changes in IDGC configuration amendments were made into our foundation documents, and the company received its new name - Open joint-stock Interregional Distributive Grid Company of Urals (IDGC of Urals, OAO for short).

In December 2007 Federal Antimonopoly Service of Russia approved our reorganization in the form of the merger of Sverdlovenergo, OAO, Chelyabenergo, OAO, Permenergo, OAO and "Kurganenergo", OAO. Also in December 2007, to convert the shares of the merged companies, the EGM of IDGC of Urals, OAO made a decision to increase the Company's charter capital by issuing common shares. These shares were placed by converting of the merged companies shares into them.

In January 2008 the EGMs of Sverdlovenergo, OAO, Chelyabenergo, OAO and Permenergo, OAO made decisions to be reorganized in the form of the merger and also approved the merger agreement as well as the transfer act.

In relation to Kurganenergo, OAO, which is also in the Company's service area, by virtue of the fact that Kurganenergo shareholders did not approve the merger, IDGC of Urals, OAO was formed as a holding company.

The reform process ended on April 30, 2008 by introducing to United State Register of Legal Entities information on discontinuation of activities of Sverdlovenergo, OAO, Chelyabenergo, OAO and Permenergo, OAO as a result of the merger into IDGC of Urals, OAO. These merged companies became subsidiaries of IDGC of Urals, OAO.

Therefore, as a result of the Company's reorganization we are the largest operating company in the Urals region which provides energy transportation and technological connection to electric networks in Sverdlovsk, Chelyabinsk and Perm regions.

OAO «IDGC of Urals» operates on the territory of 4 subjects of the Russian Federation - Sverdlovsk, Chelyabinsk and Kurgan regions (possessing a share in OAO "Kurganenergo") which are parts of the Urals Federal District as well as Perm region which is a part of the Volga Federal District.

Aims of the Issuer's creation:

- *Implementation of state policy in energy sector;*
- *Creating condition for effective functioning of the regional distributive grid complex;*
- *Efficient exploitation and centralized technological management of energy objects;*
- *Implementation of united strategy in investment policy and fund raising for solving general development problems of distributive grid complex;*
- *Elaboration and implementation of scientific and technical policy as well as implementation of progressive technologies and equipment;*
- *Profit earnings.*

Strategic aims are formulated on the analysis basis of opportunities, roles and potential of the Company, external factors, possibilities and threats for the Company's mission as well as the best domestic and international practices in exploitation of distributive grid complex.

Strategic aims of the Issuer are:

- *Provision of system reliability and security to retain sustainable functioning of the regional DGC, to secure safe exploitation of main and additional equipment and constructions as well as to prevent threats for population;*
- *Sustainable development of quality and volume of provided services in energy transmission, ecology security that should result in increase of the Company's market value as well as simultaneous creation of infrastructure basis for economic development of the region;*

The Company's value growth supposing sustainable revenue increase, profitability growth, extension and qualitative renewal of the Company's asset portfolio, that should provide satisfaction of shareholder interests, make the Company and its objects attractive as well as enable to evaluate efficiency of resource use and management governance quality.

3.6. Composition, structure and value of the Issuer's fixed assets, prospects of acquisition, replacement, retirement of fixed assets as well as all facts of fixed assets encumbrance

3.6.1. Fixed assets

As of the end of the reported period

Measurement unit: **RUR thous.**

Fixed assets	Initial (replacement) value	Depreciation
Land plots	52 793	0
Buildings	6 906 835	-3 052 888

Facilities, except lines	2 008 515	-664 031
Lines and Equipment	36 544 114	-21 094 483
Power vehicles and equipment producing energy, equipment transforming energy	40 574 471	-29 171 581
Furniture and production equipment	161 295	-132 909
Other fixed assets	1 196 244	-547 330
TOTAL	87 444 267	-54 663 222

Information on methods of depreciation contributions:

According to the accounting policy of the Issuer depreciation is charged linearly basing on the useful life of the objects

Reported date: **30.06.2012**

Results of the last revaluation of fixed assets and long lease fixed assets performed for the last 5 completed financial years preceding the reported period or for each completed financial year preceding the reported period if the Issuer operates less than 5 years and as of the reported quarter

There was no asset revaluation as of the reported period

Plans on acquisition, replacement, retirement of fixed assets with the value equaling 10% and more of the Issuer's fixed assets value and other fixed assets as well as information on fixed asset encumbrance as of the reported period:

IV. Information on financial and business performance of the Issuer

4.1. Financial and operating results

Dynamics of indicators characterizing financial and economic results of the issuer, including its profitability and loss-making calculated under financial statements

Standards (rules) under which financial statements are prepared: **RAS**

Measurement unit for uncovered loss: **RUR thous.**

Indicator	6M 2011	6M 2012
Net margin, %		1.76
Asset turnover rate, times	0.75	0.64
Return on assets, %	3.38	0.97
Return on equity, %	4.74	1.47
Uncovered loss as of the reported date	0	0
Uncovered loss as of the reported date/ balance value, %	0	0

All indicators are calculated using recommended methodology: **Yes**

Economic analysis of the Issuer's cost effectiveness based on the dynamics of indices. Reasons for profit/loss shown in the financial statements:

Decrease of revenues in 2Q 2012, in comparison to the corresponding period of 2011, was caused by reduction of transmission tariffs since May 01, 2011 (Government Decree #1172 dd. 27.12.2010) as well as transfer of 110 kV lines, used to supply Bogoslov Aluminum Plant, to FSK's lease. Positive value of ROE (1.47%), indicates profitability of the Company. ROA (0.97%) shows the ability of assets to produce a profit.

Opinions of the management bodies of the issue on reasons and level of influence on the results do not coincide: **No**

A BoD member or MB member has a special opinion on the reasons and/or the level of influence on the results shown in a BoD protocol and insists on the exposure of the opinion in the quarterly report: **No**

4.2. The Issuer's liquidity, capital adequacy and current assets

Dynamics of indicators characterizing the liquidity of the issuer under financial statements

Standards (rules) under which financial statements are prepared: **RAS**

Measurement unit for net working capital: **RUR thous.**

Indicator	6M 2011	6M 2012
Net working capital	936 229	768 872
Current liquidity ratio	1.17	1.14
Quick liquidity ratio	0.96	0.92

At issuer's discretion, here comes dynamics of indicators characterizing the liquidity of the issuer under consolidated financial statements included into the quarterly report: **No**

All indicators are calculated using recommended methodology: **No**

Economic analysis of liquidity and paying capacity of the issuer, own capital sufficiency to discharge short-term liabilities and coverage of current opex based on the analysis of indicators dynamics, including description of factors that, in the management opinion, had the most significant influence on liquidity and paying capacity:

Opinions of the management bodies of the issue on reasons and level of influence on the results do not coincide: **No**

A BoD member or MB member has a special opinion on the reasons and/or the level of influence on the results shown in a BoD protocol and insists on the exposure of the opinion in the quarterly report: **No**

4.3. Financial investments of the Issuer

As of the end of the reported period

The list of financial investments of the Issuer which comprise 5% and more of its financial investments as of the end of the reported period

Type of securities: **shares**

Full name of the Company that issued the securities: **Open Joint-Stock Company Kurganenergo**

Short name: **Kurganenergo, OAO**

Location: **3 Ulisa Nevezhina, Kurgan, Russia**

TIN: **4501013657**

PSRN: **1024500518393**

State registration date	Registration number	Authority
22.11.2003	1-01-00069-A	FSC of Russia

Number of securities owned by the issuer: **78 887 994**

Nominal value of securities owned by the issuer: **78 887 994 RUR x 1**

Overall book value of securities by the issuer: **1 185 413 596.95**

Measurement unit: **RUR.**

The issuer is a subsidiary and/or associated company in relation to the issuer that prepared the report.

The issuer does not own preferred shares. No dividends were announced and paid out

Additional information:

Investments to issued securities

Type of securities: **shares**

State registration date	Registration number	Authority
16.04.2002	1-01-65011D	FSC of Russia

Number of securities owned by the issuer: 983 278 240

Nominal value of securities owned by the issuer: 983 278 240 RUR x 1

Overall book value of securities by the issuer: 933 088 204

Measurement unit: *RUR*.

The issuer is a subsidiary and/or associated company in relation to the issuer that prepared the report. On June 10, 2011 EESK AGSM (protocol 22 dd. 15.06.2011) adopted a resolution on dividend pay-out as of 2010 results as of equal to RUR 0.0137 per common share. Payment term – within 60 days since the resolution on payment.

Additional information:

Investments to non-issued securities

There are no investments to non-issued securities comprising 5% and more of all financial investments

Other financial investments

There are no other financial investments comprising 5% and more of all financial investments

Information on the amount of potential losses related to bankruptcy of the companies in which the Issuer invested:

Information on losses is submitted according to financial investments shown in the Issuers statements as of the beginning of the reported period and up to the end of the last reported quarter

Standards (rules) of accounting statements in accordance with which the Issuer made calculations shown at the present item of the report:

Financial investments are accounted according to PBU 19/02 (Decree of the Ministry of Finance #126n dd. 10.12.2002). All financial investments are accounted according to initial value.

4.4. Non-tangible assets of the Issuer

As of the end of the reported period.

Measurement unit: *RUR*.

Intangible assets	Initial (replacement) value	Depreciation
Patents, trademarks	73	-21
TOTAL	73	-21

Standards (rules) of accounting statements in accordance to which the Issuer discloses information on its intangible assets: *Intangible assets are accounted according to PBU 14/2007 (Decree of the Ministry of Finance #153n dd. 27.12.2007). Depreciation is calculated by a linear method based on the useful life of intangible assets.*

Reported date: 30.06.2012

4.5. Information on policy and expenses of the Issuer on sci-tech development, licenses and patents, new developments and researches

The Issuer's top-management decided not to prolong the patents since they have nothing to do with production technology used by IDGC of Urals, OAO.

4.6. Trend analysis of the core business of the Issuer

Historically energy sector plays an important role for the Russian economy. Being a constituent part of fuel and energy the sector corrects the development of all spheres and serves as an indicator for economic stability in the country.

Main development tendencies in 2002-2005 were:

Creation of infrastructural organizations of wholesale market: System operator –SO CDM UES, OAO, Company for managing UNES (FSK UES, OAO, Trade system administrator (NP ATS);

Creation of generating, sales, grid companies;

Start of free sector for wholesale trade on energy "5-15";

Start of sector for wholesale trade on electric output.

Changes in regulatory environment are stated below:

1. Access to wholesale energy market (WEM) for generating companies and FSK UES, OAO since 01.01.2006. This caused the review of information exchange system between the market participants and toughening of requirements to energy accounting in gridcos.

2. Approval and enactment since 01.09.2006 of the Rules on wholesale and retail energy markets of transition period (Government Decrees #529 and 530 dd. 31.08.2006). Besides the change of the current system of WEM and clear perfection of all subjects of wholesale and retail markets these documents shall lead to changes in payments for gridcos' services and customer relations.

3. Changes in regulating charges for services rendered by FSK UES, OAO since 01.07.2006. Introduction of new principles of UNES price regulation enabled gridcos to accurately plan the volume and FSK' service charges for 2006-2008.

4. Changes in regulating charges for transmission services rendered by gridcos since 01.01.2008., double-rate tariff payment for the services – rate for network maintenance and rate for loss compensation;

5. Continuing work for setting uniform tariff for transmission services stipulated by the Federal Tariff Service and Russian Government required support of current and new "network boilers" in 2007. This scheme, aside from setting uniform tariff for transmission services requires contractual relations on energy transfer. In 2009 there are 2 network boiler schemes in gridcos of the Company's service area.

The following factors have a significant impact on the energy sector: reform velocity, namely readiness of regulatory environment, paying ability of consumers as well as technical status of main productive assets.

4.6.1. Analysis of factors and conditions affecting Issuer's activities

Energy reform and a considerable level of state industry regulation (including tariff regulation) are the main factors having a considerable impact on the energy sector on the whole, the Issuer's activities and other companies in the service area as well as other participants of energy market.

The factors and conditions capable to influence the Issuer's activities are stated below:

- Overvaluation of contract demand volume planned at calculation of energy transmission services from the volume in forecasted balance of the Federal Tariff Service, consumer refusal to pay for the services according to contract demand due to energy consumption decrease;

- Decrease of real energy consumption in comparison to the planned levels which were taken for calculation of energy transmission tariffs;

- The FTS's approval of ultimate transmission tariffs that do not include required financial expenses for ensuring reliable and non-stop current activities of the Company as well as its further development;

- Incident increase due to depreciation of the Company's assets. Physical depreciation and technological aging of the fixed assets, toughening of requirements for reliability and fail-safety, increase of possible severe accidents as a result of energy object destruction - all this demands a special attention to the issues of reliability and security of asset.

These factors are constituent parts of overall development tendency of the energy market. In Issuer's opinion, they are capable to have a short-term impact on the Issuer's business in a mid-term perspective.

The Issuer currently actively implements investment policy both to update old equipment, to develop grids as well as to launch of new objects.

In the Issuer's opinion, the following measures will be effective at present as well as future:

- Creation of conditions and prerequisites for investments into energy sector;

- Joint activities on adjustment of regional development plans for more accurate and precise energy sector development;

- Increase of regional energy sector efficiency;

- Creation of united grid area using integration of regional networks into the Company's networks to increase reliability of energy supply.

4.6.2. The Issuer's competitors

The issuer operated as a monopoly regulated by the state in transmission and connection tariffs. The issuer occupies a dominant position on transmission market in the service area.

In terms of conventional units the market share is 65% (Permenergo), 45% (Sverdlovenergo), 62%

(Chelyabenergo).

In terms of productive supply the market share is 71% (Permenergo), 64% (Sverdlovenergo), 64% (Chelyabenergo).

There are 289 local grids in our service area, including industrial plants providing services for sub-consumers, 30 being large ones, including: Ekaterinburg Electric Grid Company, OAO, Regional grid company, OAO; Sverdlovsk railroad – branch of RZhD, OAO; Oblkommunenergo, GUP SO; Tagilenergostei, ZAO; Lukoil – Energogaz, OOO; KES-Prikamye, OAO; Energosbyt, OAO; SC Kontakt, OOO; Chelyabinsk electric grid company, OOO; Regional grid company, OOO (Chelyabinsk).

Policy with regard to competitors lies in subsequent M&A of the competitors.

V. Detailed information on persons being members of management and control bodies of the Issuer and brief overview on the personnel

5.1. Information on structure and competence of the managing bodies of the Issuer

Full structure of the managing bodies and their competence in accordance with the Charter (founding documents):

In compliance with item 9.1., article 9 of the Charter managing bodies of the Issuer are:

- General Shareholder Meeting, a supreme managing body*
- Board of Directors, body executing general management of the Issuer's activities*
- Management Board, a collegiate executive body*
- General Director, sole executive body*

The competence of general shareholder meeting is stated in article 10 of the Charter:

“The following issues shall pertain to the GSM reference:

- 1) Introduction of amendments and supplements to the Charter or approval of a new version of the Charter;*
- 2) The Company's re-organization;*
- 3) The Company's liquidation, appointment of a liquidation commission and approval of interim and final liquidation balance-sheets;*
- 4) Definition of quantity, nominal value, category (type) of authorized shares and the rights provided by the shares;*
- 5) Increase of the Charter capital by enlarging the nominal value or placing additional shares;*
- 6) Decrease of the Charter capital by reducing the nominal value, purchasing shares to reduce their total amount as well as by redeeming shares acquired or paid-up by the Company;*
- 7) Splitting and consolidation of the Company shares;*
- 8) Decision-taking on the placement of bonds convertible into shares and other emissive securities convertible into shares;*
- 9) Determination of the BoD membership, election of its members and early termination of their powers;*
- 10) Election of the Audit Commission and early termination of their powers;*
- 11) Approval of the Company's auditor;*
- 12) Decision-taking on transferring the powers of the sole executive body of the Company to a managing company (a managing director) and early termination of its powers;*
- 13) Approval of annual reports and financials including profit and loss statements (profit and loss accounts) of the Company, as well as profit distribution (including dividend pay-out (declaration), except for the profit distributed as 3M, 6M and 9M dividends and losses as of the financial year;*
- 14) Dividend pay-out (declaration) as of 3M, 6M and 9M results;*
- 15) Determination of the procedure for arranging a GSM;*
- 16) Decision-taking on approving transactions in cases envisaged by Article 83 of the Federal Law "On Joint-Stock Companies";*
- 17) Decision-taking on approving major transactions in cases envisaged by Article 79 of the Federal Law "On Joint-Stock Companies";*
- 18) Decision-taking on participation in financial and industrial groups, associations and other unions of commercial companies;*
- 19) Approval of internal documents regulating the activities of the Company's bodies;*
- 20) Decision-taking on remuneration and/or compensations paid to the Audit Commission;*
- 21) Decision-taking remuneration and/or compensations paid to the Board of Directors;*
- 22) Decision-taking on other issues stipulated by the Federal Law "On Joint-Stock Companies".*

Issues referred to the GSM competence shall not be passed over for resolution to the Board of Directors, Management Board and CEO. A GSM shall not be entitled to review or take decisions on the issues that are not

referred to its competence by the Federal Law "On Joint-Stock Companies".

The competence of the Issuer's BoD is stated in article 15 of the Charter:

"The Board of Directors shall manage the Company, except for issues referred to the GSM competence by the Federal Law "On Joint-Stock Companies" and the present Charter.

The following issues shall pertain to the BoD reference:

- 1) *1) Definition of the Company's priorities and development strategy;*
- 2) *AGM and EGM convention, except for the cases specified in item 14.8., Article 14 hereof as well as announcement of the date for a new GSM instead of the abortive one, not held due to the lack of quorum;*
- 3) *Approval of the GSM agenda;*
- 4) *Election of a GSM secretary;*
- 5) *Determination of the date when the list of persons entitled to participate in the General Meeting is to be drawn up; approval of estimated expenses for GSM arrangement and other issues connected with its preparation and arrangement;*
- 6) *Proposal of issues, envisaged by subitems 2, 5, 7, 8, 12-20, item 10.2, Article 10 herein, for GSM's resolution as well as the issue on the Charter Capital reduction by reducing nominal value;*
- 7) *Placement of bonds and other securities, except for the cases outlined by the Russian legislation and present Charter;*
- 8) *Approval of Security Issue Resolution, the Prospectus and Issue Results Reports, Acquisition Results Reports, Redemption Results Reports, Buy-out Results Reports;*
- 9) *Evaluation (monetary value) of property, offering and buy-out price in cases envisaged by the Federal Law "On Joint-Stock Companies", as well as solving issues stipulated by subitems 11, 22, 38, item 15.1., Article 15 hereof;*
- 10) *Acquisition of the outstanding shares, bonds and other securities in cases stipulated by the Federal Law "On Joint-Stock Companies";*
- 11) *Alienation (sale) of the shares possessed by the Company as a result of purchase or buy-out as well as in other cases stipulated by the Federal Law "On Joint-Stock Companies";*
- 12) *Election of the CEO and early termination of the powers including decision-taking on the early termination of the labor contract;*
- 13) *Determination of the Management Board membership, election of MB members, determination of remuneration and compensations paid to them, early termination of their powers;*
- 14) *Recommendations to the GSM on remuneration and compensations paid to the Audit Commission members and Auditor's fee;*
- 15) *Recommendations on the dividend amount and payment procedure;*
- 16) *Approval of the Company's internal documents stipulating the procedure for Company's fund generation and usage;*
- 17) *Decision-taking on fund usage; approval of special-purpose fund cost estimates and review of cost estimate completion results;*
- 18) *Approval of the Company's internal documents, except for the documents which approval pertains to the GSM competence as well as other internal documents which approval pertains to the competence of executive bodies;*
- 19) *Approval of a business plan (updated business plan), including investment program and a quarterly report on their completion as well as the approval (adjustment) of the control indicators of the Company's cash flows;*
- 20) *Review of investment program, including amendments to it;*
- 21) *Establishment of branches and representative offices, their liquidation as well as introduction of amendments to the Charter concerning the establishment of branches and representative offices (including change of their names and location) and their liquidation;*
- 22) *Decision-taking on the participation in other companies (joining an existing organization or forming a new one including approval of founding documents) and the purchase, sale and encumbrance of the charter capital in companies in which the Company participates, change of the share to the charter capital of a corresponding company, withdrawal from other companies;*
- 23) *Definition of the Company's credit policy regarding granting of loans, conclusion of credit and loan agreements, provision of guarantees, acceptance of bill obligations (promissory notes and bills of exchange), property hypothecation and decision-taking on making the above-mentioned transactions in cases when decision tree is not outlined by the Company's credit policy, as well as decision-taking on adjustment of the Company's debt position to the limits, set forth by the Company's credit policy;*
- 24) *Approval of major transactions in cases set forth by Article X of the Federal Law "On Joint-Stock Companies";*
- 25) *Approval of transactions set forth by Article XI of the Federal Law "On Joint-Stock Companies";*
- 26) *Approval of the Company's Registrar, details of the contract and contract termination;*
- 27) *Election of the BoD Chairperson and early termination of the powers;*

- 28) *Election of the BoD Deputy Chairperson and early termination of the powers;*
- 29) *Election of the Corporate Secretary and early termination of the powers;*
- 30) *Preliminary approval of decisions regarding the Company's transactions connected with gratuitous transfer of the Company property or title (demands) to itself or a third party; transactions involving discharge of property liability to itself or a third party; transactions connected with gratuitous rendering by the Company of the services to third parties in cases (amounts) determined by separate BoD resolutions and adoption of resolutions on transaction conclusion in cases where the above-stated cases (amounts) are left undetermined;*
- 31) *Decision-taking on the suspension of the powers possessed by a managing company (a managing director);*
- 32) *Decision-taking on the appointment of the Acting CEO, in cases determined by separate BoD resolutions, as well as bringing her/him to disciplinary liability;*
- 33) *Bringing the CEO and MB members to disciplinary liability or reward in accordance with the Russian labor legislation;*
- 34) *Review of CEO's reports on operations (including those relating to her/his performance), on implementation of GSM and BoD resolutions;*
- 35) *Approval of the interaction procedure between the Company and companies in which the Company has a stake;*
- 36) *Determination of the Company's (its representatives') position, including the instruction to vote or refrain from voting on agenda issues, to vote "FOR", "AGAINST", "ABSTAIN" on the following agenda issues of the SAC's GSM (except for the cases when SAC GSM functions are performed by the BoD) and BoD sessions (except for the issue on GSM agenda approval when functions of SAC GSM are performed by the BoD):*
- a) Determination of SAC GSM agenda;*
 - b) Affiliate restructuring or liquidation;*
 - c) Determination of the membership in management and control bodies of SACs, nomination, election of the members and pre-term termination of their powers, nomination and election of the sole executive bodies of SACs and pre-term termination of powers;*
 - d) Definition of the membership of SAC management and control bodies, nomination, election of the members and pre-term termination of the powers, nomination, election and pre-term termination of the powers of the sole executive body;*
 - e) Determination of amount, par value, category (type) of SAC's authorized shares and the rights vested by those shares;*
 - f) Increase of the SAC's charter capital by increasing the nominal value or by placing additional shares;*
 - g) Placement of SAC's securities convertible into common shares;*
 - h) Splitting and consolidation of SAC's shares;*
 - i) Approval of major transactions concluded by SACs;*
 - j) SAC's participation in other companies (joining an existing company or establishment of a new company) as well as acquisition, alienation and encumbrance of shares and interests in the charter capital of companies where a SAC has a stake; change in participatory interest of relevant company;*
 - k) Conclusion of transactions by a SAC (including multiple interrelated transactions) involving acquisition, alienation or eventual alienation of the property comprising the main assets, intangible assets, incomplete construction sites for the purpose of electricity/thermal energy generation, transmission, dispatching, and distribution in cases (amounts), determined by the interaction procedure between companies in which the Company participates, approved by the BoD;*
 - l) Introduction of amendments and supplements to SAC's founding documents;*
 - m) Determination of the procedure for SAC's BoD and AC members remuneration pay-out;*
 - n) Approval of target key performance indicators (adjusted target key performance indicators);*
 - o) Approval of a report on the completion of planned annual and quarter key performance indicators;*
 - p) Approval of a business plan (an updated business plan), including investment program and a quarterly report on its execution;*
 - q) Approval of a report on business plan completion;*
 - r) Approval of profit and loss distribution based on the fiscal year-end results;*
 - s) Recommendations for dividend amount and payout procedure;*
 - t) Dividends payment (declaration) as of 1Q, 1H, 9M as well as fiscal year results;*
 - u) Review of an investment program, including amendments to it;*
 - v) Approval (review) of a report on investment program completion.*
- 37) *Determination of the Company's (its representatives') position on the following SAC BoD agenda issues (including the instruction to vote or refrain from voting on agenda issues or to vote "FOR", "AGAINST" or "ABSTAIN" on draft resolutions):*
- a) Determination of SAC representatives' positions on agenda issues of GSM and BoD of their SACs regarding conclusion (approval) of transactions (including multiple interrelated transactions) to involve acquisition, alienation or potential alienation of the property comprising the capital assets, intangible assets, incomplete construction projects for the purpose of electricity/thermal energy generation, transmission,*

- distribution in cases (amount) determined by the interaction procedure between companies in which the Company participates, approved by the BoD;*
- b) Determination of SAC representatives' positions on agenda issues of GSM and BoD of their SACs that are involved in generation, transmission, dispatching, distribution and sale of electrical and thermal energy, regarding reorganization, liquidation, increase of the charter capital by increasing the nominal share value or by placing additional shares as well as offering securities convertible into common shares;*
- 38) Preliminary approval of the Company's decisions on:**
- a) Transactions involving the Company's non-current assets exceeding 10% of the book value of the assets according to the data reflected in the financials as of the last reported date;*
- b) Transactions (including multiple interrelated transactions) involving acquisition, alienation or potential alienation of property comprising the main assets, intangible assets, uncompleted construction objects for the purpose of electrical/thermal energy generation, transmission, dispatching, distribution in cases (amount) determined by special BoD resolutions;*
- c) Transactions (including multiple interrelated transactions) involving acquisition, alienation or potential alienation of property comprising the main assets, intangible assets, uncompleted construction objects for the purposes other than electrical/thermal energy generation, transmission, dispatching, distribution in cases (amount) determined by special BoD resolutions.*
- 39) Nomination of candidates for election to the sole executive body, other management and control bodies, as well as auditor candidates at legal entities in which the Company participates and which are involved into electrical/thermal energy generation, transmission, dispatching, distribution and sales as well as maintenance and other service activity types;**
- 40) Determination of directions for insurance coverage of the Company, including approval of a Company's underwriter;**
- 41) Approval of the organization structure of the Company's Executive Office and introduction of amendments to it;**
- 42) Approval of the Regulations on the CEO's financial stimulation, Regulations on financial stimulation of the Company's management; approval of the management list.**
- 43) Approval of candidates nominated for several positions of the Company's Executive Office determined by the BoD;**
- 44) Preliminary approval of the collective agreement, agreements concluded by the Company within the framework of regulating social and labor relations as well as approval of documents on state pension provision for the employees;**
- 45) Creation of BoD committees, election of BoD committee members and pre-term termination of the powers possessed by the BoD Committee Chairpersons;**
- 46) Approval of independent appraiser (-s) candidates for appraisal of shares, property and other Company assets in cases stipulated by the Federal Law "On Joint-Stock Companies", the present Charter and special BoD resolutions;**
- 47) Approval of a financial advisor candidate, hired in accordance with the Federal Law "On Securities Market", as well as candidates for issue manager and advisors on transactions directly related to raising funds in the form of public borrowings;**
- 48) Preliminary approval of transactions capable of entailing foreign cash commitments (or commitments with the values being attached to foreign cash) in cases and amount determined by special BoD resolutions as well as when the BoD has not determined the above-mentioned cases (amounts);**
- 49) Approval of the Company's purchase policy, including the approval of the Regulations on the regulated purchase procedures, approval of the head of the central purchase body and its members, as well as approval of annual purchase program and decision-taking pursuant to the documents regulating purchase policy of the Company;**
- 50) Decision-taking on the CEO nomination to government awards;**
- 51) Approval of target (adjusted) key performance indicators (KPIs) and KPI completion reports;**
- 52) Shaping the Company's policy aimed at enhancing the reliability of distribution grids and other network facilities, including approval of the Company's strategic programs to improve grids reliability, development and safety;**
- 53) Shaping the Company's housing policy with regard to granting corporate support to employees to improve their living conditions by subsidies, expense compensations, interest-free loans and to taking decisions on the above-mentioned support in cases when support policy has not stipulated the support procedure;**
- 54) Other issues referred to the BoD competence by the Federal Law, "On Joint-Stock Companies" and the present Charter.**

Issues, referred to the BoD competence, shall not be passed over for consideration by the Company's CEO and Management Board.

The Management Board's competence is stated in Article 22 of the Charter:

“The MB competence shall include:

- 1) Elaboration and submission of the Company's development strategy for the BoD's review;*
- 2) Preparation of the annual (quarter) business plan, including the investment program and a completion report, approval (adjustment) of cash flows (budget) of the Company;*
- 3) Preparation of the Company's annual report on financial and economic operations as well as on the execution of GSM- and BoD-approved decisions by the MB;*
- 4) Review of reports, prepared by the CEO's deputies, heads of separate subdivisions, on the results of approved plans, programs, instructions as well as review of reports, documents and other information about operation of the Company and its SACs;*
- 5) Decision-taking on the issues referred to the competence of the supreme authorities of the companies where the Company possesses 100 (One hundred) percent of the charter capital (taking into account subitem 36, 37 item 15.1., Article 15 hereof);*
- 6) Preparation and submission of financial and economic reports of the companies where the Company possesses 100 (One hundred) percent of the charter capital for a BoD review;*
- 7) Decision-taking on conclusion of major transactions (property, work and services which cost amounts to 1 up to 25 percent of the Company's assets book value, determined as of the date of taking a decision to conclude such a transaction (except for the cases specified in subitem 38, item 15.1 hereof);*
Decision-taking on other issues according to decisions adopted by the GSM, BoD as well as issues submitted by the CEO for MB's review.

The CEO's competence is stated in article 23 of the Charter:

“The CEO's competence shall include all matters of day-to-day management of the Company, except for issues referred to the GSM, BoD and MB competence. The CEO shall act without the power of attorney, on behalf of the Company, including the restrictions stipulated by the Russian legislation, the present Charter and BoD resolutions:

Ensuring fulfillment of the Company's plans required for reaching its objectives;

- Arranging accounting and reporting operations;*
- Administering the Company's property, concluding transactions on behalf of the Company, issuing powers of attorney, opening the clearing and other accounts at banks, other credit institutions (and also in cases stipulated by the legislation - at organizations being professional participants of securities market);*
- Issuing decrees, approving (adopting) instructions, internal regulations and other internal documents of the Company regarding her/his competence; giving instructions obligatory for execution by all Company employees;*
- Approving the Regulations on the branches and representative offices;*
- Approving staff schedule and official salaries according to the organization structure of the Company's executive office;*
- Exercising rights and liabilities of the employer regarding the Company's employees as stipulated by the labor legislation;*
- Performing the functions of the MB Chairperson;*
- Distributing responsibility between the CEO deputies;*
- Submitting reports on financial and business operations of the subsidiary and associated companies, whose shares are owned by the Company as well as information on other companies where Company has a stake for a BoD's review, except for the cases described in subitem 6, item 22.2 Article 22 hereof;*
- Within 45 (Forty five) days prior to the AGM date, submitting annual report and financial statements, profit and loss statement as well as distribution of profits and losses for a BoD's review;*
- Considering other issues of the Company's activity, except for the issues related to the GSM, BoD or MB competence.*

Coupon yield per a bond: **RUR 0.23**
Coupon yield of the bond issue: **RUR 138 000**
Term for payment: **16.05.2008**.

2) Type of yield: **nominal value, redemption of bonds on the creditors' demand due to the Issuer's restructuring**
Form and procedure for yield payment:

Redemption date on the holders' demands submitted during the redemption period is determined as 2nd working day of ith coupon period.

The bonds are redeemed on the creditors' demand according to the following procedures:

a) a bondholder concludes a contract with any broker being a trade exchange participant and submits an instruction to take measures to sell bonds to the Issuer. A bondholder being a trade exchange participant acts independently. Trade participant acting for and on behalf of bondholder or at his own expense hereinafter is referred to as a Holder or a Bondholder;

b) During submission period a Holder should forward to the Issuer's agent a written notification on intention to sell a certain amount of bonds (hereinafter referred to as the Notification). The notification should be signed by the authorized person of a Holder. The Issuer redeems bonds on the creditor's demand according to the rules of exchange.

In case of exchange restructuring or liquidation or in case when such redemption using exchanges as is stated in the Issue Resolution and Prospectus does not correspond with the Russian legislation, the Issuer decides on the trade institution using which the Issuer will conclude transactions for redemption. In this case, the bonds will be redeemed according to the legal documents regulating such trade institutions. The Issuer also should publish information on the trade institution used for transactions alongside with the message on coupon rate determination.

Redemption price:

100% from the par value of the bond issue. The Issuer also pays coupon yield calculated according to the present Issue Resolution and Prospectus as of the redemption date. Bonds are paid in monetary form, non-cash settlement, in Russian currency according to the exchange rules.

c) Transactions on redemption are settled through the Issuer's agent in the trading system of the exchange according to the rules of the exchange.

The redeemed bonds can be re-issued in future and can circulate on trading market until the end of redemption (in case the Issuer complies with the Russian legislation).

Term for payment: 16.05.2008

Number of bonds redeemed: 600 000

Yield amount: RUR 600 000 000

On 13.05.2010 02-series documentary interest-bearing bearer bonds were redeemed, as of the redemption date the issuer had 600 bonds on its account. The amount of liabilities in money terms totaled RUR 0.

02-series bonds were redeemed on 13.05.2010.

01-series documentary interest-bearing bearer bonds with centralized custody were redeemed on 22.05.2012.
