## **Introduction**

Basis for the Issuer's liability to disclose information in the form of Quarterly Report

***The registration of the Issuer's security prospectus was carried out.***

On March 27, 2008 Russian Federal Service on Financial Markets registered the Prospectus of Open Joint-Stock Company "Interregional Distributive Grid Company of Urals" (registration numbers 4-01-32501-D, 4-02-32501-D dated 27.03.2008).

The present quarterly report contains evaluations and forecasts of the Issuer's executive bodies with regard to future events and/or actions, industry development perspectives as well as its operation results, including the Issuer's plans, probability of certain events and actions.

Investors should not full rely on evaluations and forecasts provided by the Issuer's executive bodies, since real future operating results may differ from forecasted ones due to many reasons. Purchasing the Issuer's securities may be risky, as is described by the quarterly report.

## I. Background of persons forming the Issuer's managing bodies, bank accounts, auditor, appraiser and financial advisor as well as other persons who signed the quarterly report

Financial year (years), during which the auditor had an independent audit of accounting and financial statements of the Issuer

Year
2010

Factors that may challenge the auditor's independency, including information on interests between the auditor (executive officers of the auditor) and the Issuer (executive officers of the Issuer)

*There are no factors that may challenge the auditor's independency, including information on interests between the auditor (executive officers of the auditor) and the Issuer (executive officers of the Issuer)*

Procedure for choosing the Issuer's auditor

Auditor Tender and its major conditions:

*A candidate for the Issuer's auditor is determined by a competitive auditor selection arranged by IDGC Holding, OAO. To participate in the selection auditor companies should meet the following demands:*

- *Not to be in the process of liquidation;*
- *To receive no resolutions on suspension of operations taken in compliance with the procedure stipulated by the Russian Administrative Code as of the date of application submission;*
- *To possess no debts on taxes, levies and other obligatory payments to various budgets or state extra-budgetary funds for the last reported year. The debt should not exceed 25% of the participant's book asset value according to accounting statements as of the last reported period. The participant is also considered valid, when he appeals the debt pursuant to the Russian legislation and resolution on the appeal is not taken as of the application review date;*
- *Not to be under the conditions (with regard to the Company and SACs of IDGC Holding, OAO), stated in item 1, article 12, Federal Law "On audit activities. The Issuer's auditor makes inspections of financial and operating activities of the Issuer in accordance with the requirements set forth by the Russian legislation on the basis of agreement concluded with the auditor.*

Procedure of nominating auditor candidate for approval by shareholder meeting, including managing body taking the following decision:

*Following the auditor competitive selection the Issuer's BoD recommends the corresponding auditor candidate to shareholder meeting for approval.*

Information on services rendered within special auditor assignments:

*In accordance with the legislation requirements the Issuer is obliged to perform annual audit of its financial statements. For audit and acknowledgement of annual financials AGM annually approves the Company's auditor. There were no special auditor assignments.*

Remuneration determination procedure, actual amount of remunerations paid to the auditor at the end of each year (for the last 5 years) when the auditor audited the Issuer's financials:

*There was no remuneration paid to the auditor as of the reported period*

Information on deferred and overdue payments for the services rendered by the Auditor:

*There are no deferred and overdue payments for the auditor services.*

*Potential factors that can challenge the auditor's independency, including information on significant interest between the auditor (the auditor's officers) and the issuer (the issuer's officers):*

- *the auditor's (or its officers) share in the charter capital of the issuer: none;*
- *money borrowed by the auditor (its officers) from the issuer: none;*
- *close business contacts (participation in promotion of the issuer's services or joint business, etc.) as well as kinship: none;*
- *the issuer's officers are simultaneously the auditor's officers: no.*

Measures taken by the issuer and the auditor to eliminate the factors:

*The issuer and the auditor interacted within the current legislation, in particular, according to Federal Law #119-FZ dd. 07.08.2001 on the Auditor's activities. According to its art. 12, the audit cannot be performed by:*

- 1) auditors being the founders (stockholders) of the audited entities, their directors, accountants and other persons responsible for accounting and financials administration;*
- 2) auditors with a close kinship (parents, spouses, brothers, sisters, children as well as brothers, sisters, parents and children of the spouses) with the founders (stockholders) of the audited entities, their officers, accountants and other persons responsible for accounting and financials administration;*
- 3) auditor companies, with directors and other officers being the founders (stockholders) of the audited entities, their officers, accountants and other persons responsible for accounting and financials administration;*
- 4) auditor companies, with directors and other officers being in a close kinship (parents, spouses, brothers, sisters, children as well as brothers, sisters, parents and children of the spouses) with the founders (stockholders) of the audited entities, their officers, accountants and other persons responsible for accounting and financials administration;*
- 5) auditor companies in relation to audited entities being their founders (stockholders); in relation to audited entities, with the auditor companies being the founders (stockholders); in relation to subsidiaries, branches and representative offices of the audited entities as well as in relation to companies possessing the same founders (stockholders) as the auditor company;*
- 6) auditor companies and individual auditors, rendering services on accounting recovery and administration as well as financials administration for natural persons and legal entities (in relation to these persons) during three years prior to the audit.*

*The basic measure taken by the issuer to decrease mutual dependency is a thorough review of an auditor candidate with a view to the auditor's independency. The auditor is completely independent from the issuer's managing bodies in accordance with art.12 of the Federal Law on the auditor's activities; the auditor remuneration did not depend on the auditor results.*

#### **1.4. Information on the Issuer's appraisers**

*There are no appraisers engaged by the Issue*

#### **1.5. Information on the Issuer's advisors**

*There are no financial advisors engaged by the Issuer*

#### **1.6. Information on other persons who signed this quarterly report**

*There are no such persons*

## **II. General information on financial and economic status of the issuer**

### **2.1. Financial and business performance of the Issuer**

Measurement unit: **RUR thous.**

Indicators	9M 2009	9M 2010
Net asset value	27 907 949	30 550 349
Debt/ Equity ratio, %	48.45	37.2
Short-term debt/ Equity ratio, %	20.45	20.09
Coverage of debt charges, %	150.1	158.99
Overdue debt, %	0	0
Receivables turnover, times	5.22	6.79
Dividend payout ratio, %	0	0
Labor efficiency, RUR thous./person	2 678.589	3 235.1
Depreciation/Revenues ratio, %	5.24	1.82

*To calculate the indicators we used the methodology recommended by the Regulations on information disclosure by the issuers (approved by the FSFM's decree #06-117/pz-n dd. 10.10.2006. Net assets are calculated in accordance with the procedure for net asset value appraisal (approved by decree #10n issued by the Russian Ministry for Finance and FSC's decree #03-6/pz dd. 29.01.2003.*

*In 3Q 2010 net asset value increased by RUR 1 270 thous. As of 3Q 2010 the indicators changed due to the decrease of short-term liabilities and growth of equity caused by non-distributed profit. Short-term obligations changed due to decrease of payables and utilization of connection advances.*

## 2.2. Market Capitalization of the Issuer

*Market capitalization is calculated by multiplying the quantity of shares of a certain category (type) and share market price by a trade institution in accordance with the Procedure for market price calculation of securities and investment units of investment funds, admitted for trading through trade institutions approved by the Russian FSC's Decree #03-52/ps dated 24.12.2003.*

Indicator	3Q 2010
Market capitalization, RUR	25 931 882 061

Information on trade institution on securities market which information is used for calculating market capitalization as well as other additional information on public securities trading at the discretion of the Issuer:  
Trade institutions:

### 1. Open Joint-stock Company "Stock Exchange Russian Trading System", address: 38 building 1, Dolgorukovskaya Ulitsa, Moscow, 127006

On June 11, 2008, due to a resolution of Deputy MB Chairperson of OAO "SE RTS" dd. June 07, 2008 ordinary non-documentary shares of OAO "IDGC of Urals", with the nominal value of RUR 0.1, state registration numbers: 1-01-32501-D dd. May 03, 2005; 1-01-32501-D-001D dd. February 12, 2008; 1-01-32501-D-002D dd. April 24, 2008; 1-01-32501-D-003D dd. April 24, 2008; 1-01-32501-D-004D dd. April 24, 2008; 1-01-32501-D-005D dd. April 24, 2008; 1-01-32501-D-006D dd. April 24, 2008; 1-01-32501-D-007D dd. April 24, 2008, are in the list of securities admitted for trading without listing, securities code: MRKU, MRKUG.

**2.4. Purposes of issues and usage of funds raised from security placement**

***During the reported period the Issuer did not place any securities by subscription.***

**2.5. Risks related to purchase of placed securities**

Risk management policy of the Issuer:

The activities of OAO "IDGC of Urals" are affected by a range of factors that are beyond the Company's control. Many of the risk factors described below are of macroeconomic character and typical for any company. Certain business segments are subjects to certain risk factors.

Risks in energy transmission services, to certain extent, derive from the risks in the wholesale and retail energy markets. These developing markets, in their turn, are more risky than developed markets (dealing with other products and services) and include significant legal, economic and political risks. Political risks have a small contribution to overall risks. Dynamic development of the wholesale and retail energy markets enable us to suppose that the given information can quickly become outdated. The current information uncertainty, caused by the dynamism of the factors, can influence the Company's future activities, possibility for asset sale and observance of maturity dates. Besides, several risks which are not currently significant can become economically viable in future.

Risks of OAO "IDGC of Urals" are managed on a systematic ongoing basis. The Company is always active in detecting events having a potentially bad influence on any aspect of its activity, in evaluation and control of would-be negative consequences or opportunities of such consequences, in implementation of effective measures on risk minimization or liquidation as well as correcting the results of the chosen strategy. The goal of the risk management system is to achieve the Company's aims and decrease the possibility of potential losses, to provide its long-term stable operations and observe the balance of interest of all interested parties.

With a view to prevent potential risks, OAO "IDGC of Urals" regularly monitors social economic and normative legal environment, projects international economic environment and elaborates possible future scenarios, strategic plans and executes control over operations. Decisions on risk management taken by our top managers are in compliance with the current Russian legislation and provide good balance between positive effect from decisions and expenses caused by implementing them. . Implementing decisions on risk management we constantly analyze their practical effectiveness.

**Main risk management methods used by OAO "IDGC of Urals" include:**

1. Insurance for property, industrial objects and transport, civil liability, medical insurance, etc.;
2. Diversity in retail market with a view to allocate consumers in total volume of services;
3. Evading unreliable contractors;
4. Diversity in purchase of materials, equipment, services to reduce the Company's dependence on certain contractors;
5. Evading investment projects with a potentially high risk level.

### **2.5.1. Industry risks**

Energy transmission using networks as well as technological connections to networks are state-regulated activities. Therefore, regulators' approval of the tariffs on our services directly influences the gained revenues. This causes the **following risks**:

- Approved tariffs are lower than economically viable levels;
- Revenues reduction due to changes in real structure of energy transmission in comparison to the one used while approving tariffs;
- Appearance of extra expenses related to cross-subsidization which disable the Company to set economically viable tariffs;
- Risks related to alterations in pricing legislation on electric and power energy on retail markets.

The RAB tariff methodology additionally creates the **following risks**:

- Disagreement with regulating authorities over evaluation results of initial investment base done by independent valuers;
- Approval of yield rate at the level below economically viable and, as a result, problems with borrowed resources for investment financing.

**The Company's measures to manage the risks:**

- Cooperation with Federal Tariff Service and regional regulators on economic feasibility of expenses included into tariffs as well as on changing Russian pricing legislation with taking into account disco's interests in setting energy tariffs on retail markets;
- Elaboration and integration of long-term region development programs (in the Company's service area) as well as signing agreements with regional and local authorities which stipulate investment resource volumes;
- Reduction of the Company's expenses;
- Gradual transition to RAB tariff model which will enable to secure long-term investments into grids as well as to decrease the influence of subjective factors onto tariff decisions.

Equipment unsatisfactory conditions due to its depreciation are the reason for **operational risks** main of which are:

- Deterioration of operating and economic equipment indicators;
- Unfavorable ecological consequences;
- Danger of accidents with partial or full energy shortage ending in unfavorable social consequences;
- Risk of personnel industrial injuries;
- Danger of chronic accidents.

The realization of the risks can lead to accidents (equipment breakdown) and construction destruction. Chronic accidents can lead to network separation, consumer rolling blackouts, equipment critical operations.

#### The Company's measures to manage the risks:

The possibility of equipment breakdown is on average level; to prevent this we take measures for provision of equipment and construction reliability at the appropriate level, namely:

- Repair programs are 100% fulfilled;
- Modern diagnostics methods (with equipment operating nonstop) are implemented;
- Structure and volumes of spare parts are constantly optimized;
- To increase quality of services and materials, responsibility of contractors and decrease of unit costs tender selection of service and supplier companies is introduced;
- To ensure equipment reliability emergency control systems are implemented and upgraded in compliance with modern requirements.

Risk management in observing industrial safety requirements within the frameworks of operating risk management is ensured by observing federal legislation on industrial safety and operating control system (designed on its base) over observing industrial safety requirements in OAO "IDGC of Urals".

**Ecological risks**, which represent possible transformer oil leakages (with no oil receivers mounted on the substations) into rivers and lakes that may lead to oil pollution on fishing grounds. As a result of infringes of nature-protection legislation high fines may be imposed on the Company.

#### The Company's measures to manage the risks:

To reduce ecological risks we implement the Program for Ecology Policy Integration, in compliance with which the Company focuses on three aspects: air protection, water and soil management. Within the frameworks of activities stipulated in long-range program for technical reconstruction and update, the Company substitutes old parts of equipment for new modern ones which ensure high ecological safety. To further improvement of nature-protection activities we implement ecology management system (in compliance with ISO-14001-2004).

#### **Risk of uncertainty on ultimate volumes of energy transmission**

The essence of the risk is the lack of economic development plans, including indication of energy consumption increase, in several Russian regions and cities. These circumstances make it impossible to accurately forecast branch investments which could satisfy growing demand for energy in mid- and long-term perspective. This risk mainly affects fulfillment of obligations on energy transmission.

#### The Company's measures to manage the risks:

The risk is minimized within the frameworks of united sales department of OAO "IDGC of Urals" by the following measures:

- Cooperation with regional and municipal authorities on elaboration of regional economic development plans in mid- and long-term perspective;
- Justification of energy transmission tariff with investment component focused on equipment transfer capacity increase in state tariff regulators.

Besides, the uncertainty is related to uncertainty of recession ending.

#### **Risks related to possible price change on materials, spare parts and services**

There are no risks related to service price change on foreign markets since OAO "IDGC of Urals" does not provide energy transmission services outside Russia. We also do not buy spare parts and equipment abroad. On Russian market the risk of possible price change, primarily decrease, is viewed as unlikely.

#### The Company's measures to manage the risks:

These risks can be minimized by the following:

- Increase of operating effectiveness based on operating expenses decrease programs (creation of competitive environment in purchase of services, optimization of repair and capital investment expenses, etc.);
- Well-balanced financial policy.

Taking into account the above-mentioned, we consider that possible deterioration of situation in the industry as well as negative changes in the grids operating and development process are able to affect the Company's activities but they should not considerably influence its liability fulfillment.

### **2.5.2. Federal and regional risks**

OAO "IDGC of Urals" operates in Russia and this explains the dependence of its results on social economic situation in the country. Risks related to social economical and political processes in Russia are beyond the Company's control. Russian economy is only partially protected from market recessions and delays in economic development in other countries. Financial problems and escalated perception of investment risks in developing countries during financial crisis decreased the volume of foreign investments and had a negative impact on Russian economy. Besides, since Russia produces and exports large volumes of gas and oil, Russian economy is oil and gas price-sensitive, oil price reduction in crisis already considerably slowed Russian economy development. Crisis in economy has limited the access of the majority of economic entities, including OAO "IDGC of Urals", to debt capital markets as well as had a negative influence on purchasing power of our consumers.

In December, 2009 rating agency "Standard and Poor's" reviewed its outlook from Negative to Stable regarding ratings of the Russian Federation as well as approved long- and short-term rating in foreign currency at "BBB/A-3", long- and short-term rating in notional currency at "BBB+/A-2". Decrease of Russian sovereign rating based on evaluations, provided by international rating agencies - Standard and Poor's, Fitch, Moody's - has a negative impact on the national and regional economy. Besides, decrease in sovereign credit rating, as a rule, causes decrease in credit rating of financial insti-

tutions operating in Russia and this has a negative effect on various economy sectors and directly increases risks for many economic entities, including OAO "IDGC of Urals". We cannot have a direct impact on increase of the Russian credit rating. However, we suppose that the decrease of the sovereign rating will not strongly affect our activities. It is also noteworthy that the company has a positive public credit history (successful redemption of our 2 bond issues in 2008 and 2009 according to public offers) and repays its obligations to banks on a regular basis.

Regional risks in our operations mainly appear when a regional tariff regulator ignores parts of economically viable expenses submitted by us to be included into corresponding tariff. This circumstance can have a significant impact on the Company's investment program. We forecast no negative political changes in our service area that can negatively affect our activities and economic state.

The Company's measures to manage the risks:

Majority of these risks are beyond our control due to the scale. If in Russia or a certain region the political and economical situation, which can negatively affect our operations, destabilizes, the Company will take anti-recessionary measures to decrease negative effect as much as possible, including the following:

- Decrease and optimization of operating costs and other expenses;
- Investment plan reduction;
- Decrease in financing operating activities by loans and borrowings;
- Well-balanced financial policy.

OAO "IDGC of Urals" constantly interacts with federal institutions and other interested parties to reduce the effect made by the risks. Risks of regional geographical peculiarities, including disaster danger, possible transportation termination due to remoteness and/or inaccessibility do not have a significant impact on the Company's operations, since the service area largely is not subject to the mentioned risks. Risks of disaster danger are viewed by the Company as minimal. Possibility of armed conflicts and national or regional emergency is insignificant. In case of possible armed conflicts, the Company may be under the risk of asset damage. The risks, including those with unplanned expenses to mitigate the consequences, are covered by insurance for the majority of the Company's fixed assets.

### 2.5.3. Financial risks

OAO "IDGC of Urals" as any economic entity, is subject to various financial risks. Since OAO "IDGC of Urals" does not provide services abroad and the Company's contractors are Russian residents, service prices and obligations are in Russian rubles, **the risk of currency exchange rate** is viewed as low. Since the Company has credit lines in a range of banks and interest rate change influence activities of economic entity, the Company undergoes **the risk of interest rate change**.

The Company's measures to manage the risks:

Provision of stable cash flow covering operating, investment and financial expenses. When we planned our 2009 budget, we took a range of measures including investment program decrease and increase of investment efficiency, 2009 expense optimization and maintaining borrowings at the level acceptable for the Company.

Main service purchasers are power supply companies which supply energy to end users. Therefore, main buyer-related risk is **the risk of receivables increase** due to violation of payment discipline by end users and necessity to obtain additional credit resources. There is also **the risk of fund insufficiency on the Company's bank accounts** due to temporal cash deficiency between getting money from power a supply company and financing current operations.

The Company's measures to manage the risks:

To minimize the risks persons responsible for financial management of OAO "IDGC of Urals" carry out well-balanced credit policy, receivables management aimed at its optimization and debt collection. Besides, the Company executes control over contractors' payment discipline as well as plans to increase the share of direct contracts with consumers in sales structure. In case of situation deterioration and increase of non-payments the Company plans to use regional authorities and courts to solve the problems.

Inflation directly depends on political and economical situation. According to official data inflation in Russia in 2004 totaled 11.7%, in 2005 - 10.9%, in 2006 - 9%, in 2007 - 11.9%, in 2008 - 13.3%, 2009 – 8.8%. Negative inflation effect on our activities can be related to **the following risks**:

- Risk related to losses in real value of receivables in case of significant payment delays;
- Risk of increase of interest payable;
- Risk of prime cost increase due to price increase on energy carriers, transportation services, wages and salaries, etc.;
- Risk of decrease in real value of investment objects.

The Company's measures to manage the risks:

If inflation growth exceeds regulated tariff growth, the Company's profitability will decrease. Therefore, in case of considerable growth of real inflation over the Government forecasts, namely up to 30-40% per year, we plan to do the following:

- To limit expense growth;
- To decrease receivables and its average turnover period;
- To elaborate to maximize tariff growth within normative limits.

Nevertheless, OAO "IDGC of Urals» views the possibility of high inflation in mid-term perspective as a very low one due to declared intentions of the Russian government and Central Bank to carry out anti-inflation policy.

#### 2.5.4. Legal risks

Since the Issuer operates in Russia and does not export goods and services, the issuer can face the risks that appear during domestic operation. This is typical for majority of businesses operating in Russia.

There exist legal risks, particularly, related to controversial interpretation of legal norms which can lead to incorrect taxation and tax payments. To reduce the risks the issuer's accounting department alongside with the legal department constantly improve tax base methodology and control over compliance with the current legislation. Besides, there exist risks of losses related to legislation changes as well as incorrect legal document preparation and activities accompaniment. To minimize the risks all operations undergo an obligatory preliminary legal expertise.

The issuer (as well as all joint-stock companies operating in Russia) can face the risk of legislation changes (federal laws and subordinate legislation) regulating shareholder and corporate relations. OAO "IDGC of Urals", as an issuer, is subject to the risks of shareholders' appeal of major and interested parties transactions (when such transactions are concluded without proper preliminary BoD or AGM approval as well as those approved with violation of the stipulated order).

To minimize the risks the Company has an obligatory preliminary legal analysis of transactions with a view to find reasons for preliminary corporate procedures stipulated by the legislation in force and/or the Charter. In case of necessity such transactions are submitted for review by the competent management bodies of OAO "IDGC of Urals".

**Shareholder relations risks** include the register risks, "greenmail" risks, risks of non-friendly shareholder activities aimed at putting AGM in jeopardy.

To minimize the risks the company has a contract for share register administration services with professional registrar (working on the Russian stock market since 1990-s) which traditionally occupies top lines in registrar ratings (including "reliability" criteria). The Company also takes measures aimed at shareholder relations (information disclosure in the order stipulated in normative legal documents as well as meetings between the Company's management and shareholders aimed at explanation of current operating issues in the Company's activities).

**Risks related to changes in currency legislation.** Risks related to changes in currency legislation and control almost will not affect our operations, since we do not plan to operate outside Russia. Our services are nominated in RUR and payments cannot be referred to payments to foreign suppliers.

**Risks related to changes in tax legislation.** Like any other company the issuer is a taxpayer. Currently tax relations in Russia are regulated by the Russian Tax Code, a range of federal laws adopted in compliance with the Russian Tax Code, laws of Russian subjects as well as subordinate legislation of local authorities. Official list of taxes and levies includes VAT (value-added tax), income tax, property tax, unified social tax and other obligatory payments.

The corresponding normative legal acts often have obscure wording or terms with no precise legal definition. Russian Ministry for Finance and Federal Tax Service authorized to provide official explanations of tax legislation, often give explanations and comments which contradict both tax legislation norms and relevant legal practice. Fiscal bodies are guided by the acts and documents of the mentioned state bodies which are aimed solely at refilling budgets on different levels, moreover, often doing violence to rights and legal interests of taxpayer. Preparation and submission of tax reports alongside with other elements of tax relation regulation system are the competence of, primarily, tax institutions which enjoy the right to additional tax, levies and fine assessment. As a result, tax risks in Russia are considerably higher than tax risks typical for countries with developed market economy and tax system.

Tax risk may include: possibility of new taxes and levies; possibility of current tax rate increase; tax base extension, changes in terms and order of tax payments and reporting. The most significant tax risk for OAO "IDGC of Urals" is the **risk of tax rate increase**. Our management considers that the Company fully observes tax legislation in terms of its operations, but still this do not eliminate potential tax risks in case of changes in state fiscal policy in relation to certain taxes and levies as well as changes (not for taxpayer benefit) in court practice on certain tax cases.

Risks related to changes in tax legislation have an equal influence on both the Issuer and other market participants. The most significant change in 2010 is cancelation of uniform social tax (UST) and transition to insurance contributions to non-budget funds, control and administration done by the Russian Pension Fund and Federal Insurance System (Federal Laws #212-FZ, #213-FZ dd. 24.07.09). The main change is increase of rates since 2011, "transition" rates (equaling UST rates) remaining stable during 2010. Besides, several privileges were cut, norm of alternative UST-Income Tax correlation (payments to individuals, that are not included into income tax, are not imposed with UST) was excluded.

Main risks stemming from the changes lie in tax increase, in possible increase of disputes with control bodies due to the lack of balanced administration system as well as conditions for quality inspections (highly-skilled workers, infrastructure and experience in contributor communications).

In case changes are introduced into the current taxation procedures and conditions, we'll bear this in mind planning our operations.

**Risks related to changes in customs control regulations and duties.** At the present moment and during the reported period the Issuer did not deal with operations regulated by customs and currency control legislation. Therefore, changes in customs control regulations and duties are not a significant legal risk for us.

**Risks related to changes of requirements in licensing of the Issuer's operations or of rights to use circulation-limited objects.** Reasons, conditions and procedure for licensing are regulated by Federal Law #128-FZ dd. 08.08.2001 "On Licensing Several Activities". Our primary operations - energy transmission and connection - are not subject to licensing according to the Russian legislation. During 1Q 2010 changes to the above-mentioned law did not affect our current operations, since it did not deal with our operations. In case of changes/ raised demand to obtain a license, we'll take the required measures and obtain licenses and permissions.

### **Risks related to changes in energy legislation.**

1. Changes to Connection Rules, approved by Government Decree #861 dd. 27.12.2004 (version of Government Decree #334 dd. 21.04.2009): there are no individual tariffs for applicants with the capacity of up to 100 kW, applicants with the capacity of up to 15 kW payment does not exceed RUR 550, a gridco constructs grids up to the land plot of the applicant. These changes may result in considerable shortfalls in income, non-compensated in future periods during tariff setting due to discrepancies of the expenses incurred by the gridco and money received from the applicant.

2. Changes to Connection Rules, Changes to Connection Rules, approved by Government Decree #861 dd. 27.12.2004 (version of Government Decree #334 dd. 21.04.2009): applicants with the capacity of up to 100 kW are entitled to have interest-free payments by installments within 3 years following connection. These changes may cause the risk of uncollectable receivables increase and time shortage between incurred construction expenses and money received from the applicant.

**Risks related to changes in court practice** on issues related to the issuer's operations (including licensing) can have a negative impact on results of such operations as well as results of the current issuer's lawsuits. The issuer's activities are subject to risks related to the legal system in Russia. These risks include, particularly, possible contradictions between the Russian legislation and legal acts of local executive bodies and local regional authorities as well as lack of court practice on applying several legal acts. At the moment the possibility of changes in court practice related to the issuer's activities is viewed as insignificant and will not have a great influence on its activities. In case of introducing changes into court practice on issues related to the issuer's activities, the issuer shall plan to its financial and operating activities according to these changes.

Since the Issuer does not plan to operate on external markets, we do not analyze the effect of legal risks related to the Issuer operations on external markets.

### **2.5.5. Risks related to the Issuer's operations**

#### **Risks related to the current lawsuits in which the Issuer participates.**

At the moment of preparing this report the Issuer participates in a range of lawsuits. There may be possible negative impacts on the Issuer's financial and operating performance due to pronouncement of judgment to the disfavor of the Issuer. The most significant lawsuits, according to the Issuer's opinion, are disclosed in item 7.7

#### **Risks related to a possible loss of customers contributing no less than 10% of overall revenues.**

Main business line of the Issuer is provision of services on energy transmission and technological connection to electric networks being monopolistic activities. Taking this into account, the risk related to a possible loss of consumers contributing no less than 10% of overall revenues is viewed by the Issuer as non-significant.

#### **Risks related to a possible failure to prolong a license for certain operations or usage of circulation-limited objects (including natural resources).**

In accordance with Federal Law #128-FZ dd. 08.08.2001 "On licensing certain operations" there is no licensing for main business lines of the Issuer.

#### **Risks related to the Issuer's liability for third parties' debts, including SACs.**

At present there are no such liabilities. The risk is viewed by the Issuer as non-significant.

#### **Other risks related to the Issuer's activities:**

##### Risks related to activities of third parties:

Fulfilling its contract liabilities the Issuer is exposed to risks related to activities of third parties. Besides, risks related to activities of third parties occur when wires are stolen.

## **III. Detailed information on the Issuer**

### **3.1. The history of creation and development of the Issuer**

#### **3.1.1. Name of the Issuer**

Full name of the Issuer: *Open Joint-stock Company Interregional Distributive Grid Company of Urals*

Short name of the Issuer: *IDGC of Urals, OAO*

*Full or short name of the Issuer is similar to the following legal entities*

**Open Joint-Stock Company Interregional Distributive Grid Company of Siberia (IDGC of Siberia, OAO);**

**Open Joint-Stock Company Interregional Distributive Grid Company of Volga (IDGC of Volga, OAO);**

**Open Joint-Stock Company Interregional Distributive Grid Company of Center (IDGC of Center, OAO);**

**Open Joint-Stock Company Interregional Distributive Grid Company of Center and Volga (IDGC of Center and Volga, OAO);**

**Open Joint-Stock Company Interregional Distributive Grid Company of South (IDGC of South, OAO);**

**Open Joint-Stock Company Interregional Distributive Grid Company of North Caucasus (IDGC of North Caucasus, OAO);**

**Open Joint-Stock Company Interregional Distributive Grid Company of North West (IDGC of North West, OAO).**

Explanations required to evade confusing the company names:

***To escape confusing the company names a special attention should be paid to the last word in full and short company name indicating service area – Siberia, Center, Volga, South, North Caucasus, Center and Volga, North West.***

All preceding names of the Issuer

Full name: ***Open Joint-Stock Company Interregional Distributive Grid Company of Urals and Volga***

Short name: ***IDGC of Urals and Volga, OAO***

Date of naming: ***28.02.2005***

Basis for renaming:

***Company name IDGC of Urals and Volga, OAO was changed into IDGC of Urals, OAO on 14.08.2007).***

### **3.1.2. State registration of the Issuer**

PSRN: ***1056604000970***

Registration date: ***28.02.2005***

Registering authority: ***Tax Inspection of the Russian Federal Tax Services, Leninskyi rayon, Ekaterinburg***

### **3.1.3. Creation and development of the Issuer**

The Issuer's life period since its registration date: ***69 (Sixty Nine) full months***

Short description of the Issuer's creation and development. Aims and mission of the Issuer (if exists) and other information on the Issuer's operations significant for decision-taking on purchasing the Issuer's securities:

#### **The history of IDGC of Urals, OAO:**

Open joint-stock company Interregional Distributive Grid Company of Urals was incorporated on February 28, 2005 in Ekaterinburg (the Urals) in the course of the Russian energy sector reforms following differentiation of companies which produce, transfer, distribute and sale electric and heat energy as well as operating dispatcher management into separate business units.

Main variant of the Russian distributive grid complex reform supposed the creation of interregional distributive grid companies (IDGCs) as well as interregional integration of regional distributive companies in IDGCs within the united energy systems.

According to the first IDGCs configuration, with a view to effective operation, development and reliability of the distributive complex within the united energy systems of the Urals and Middle Volga, the company included (till August 2007 our Company name was IDGC of Urals and Volga, OAO) 15 DGCs - regional discos: Kirovenergo, OAO, Kurganenergo, OAO, Marienergo, OAO, Mordovenergo, OAO, Orenburgenergo OAO, Permenergo, OAO, Penzaenergo, OAO, Samara distributive company, OAO, Saratov distributive company, OAO, Sverdlovenegero, OAO, Tyumenenergo, OAO, Udmurtenergo, OAO, Ulyanovsk distributive company OAO, Chelyabenergo OAO and Chuvashenergo.

The second IDGC configuration was formed in compliance with territorial contingency and corresponding balance cost of DGC's assets which comprised the corresponding IDGCs. According to the configuration IDGC of Urals, OAO included: Sverdlovenegero, OAO, Chelyabenergo OAO, Permenergo, OAO and Kurganenergo, OAO.

In August 2007 due to the changes in IDGC configuration amendments were made into our foundation documents, and the company received its new name - Open joint-stock Interregional Distributive Grid Company of Urals (IDGC of Urals, OAO for short).

In December 2007 Federal Antimonopoly Service of Russia approved our reorganization in the form of the merger of Sverdlovenegero, OAO, Chelyabenergo, OAO, Permenergo, OAO and "Kurganenergo", OAO. Also in December 2007, to convert the shares of the merged companies, the EGM of IDGC of Urals, OAO made a decision to increase the Company's charter capital by issuing common shares. These shares were placed by converting of the merged companies shares into them.

In January 2008 the EGMs of Sverdlovenegero, OAO, Chelyabenergo, OAO and Permenergo, OAO made decisions to be reorganized in the form of the merger and also approved the merger agreement as well as the transfer act.

In relation to Kurganenergo, OAO, which is also in the Company's service area, by virtue of the fact that Kurganenergo shareholders did not approve the merger, IDGC of Urals, OAO was formed as a holding company.

The reform process ended on April 30, 2008 by introducing to United State Register of Legal Entities information on discontinuation of activities of Sverdlovenegero, OAO, Chelyabenergo, OAO and Permenergo, OAO as a result of the merger into IDGC of Urals, OAO. These merged companies became subsidiaries of IDGC of Urals, OAO.

Therefore, as a result of the Company's reorganization we are the largest operating company in the Urals region which provides energy transportation and technological connection to electric networks in Sverdlovsk, Chelyabinsk and Perm regions.

#### **Service area**

OAO «IDGC of Urals» operates on the territory of 4 subjects of the Russian Federation - Sverdlovsk, Chelyabinsk and Kurgan regions (possessing a share in OAO "Kurganenergo") which are parts of the Urals Federal District as well as Perm region which is a part of the Volga Federal District.

The Urals is one of the largest and dynamically developing regions in Russia. Occupying less than 11.0% of the Russia's territory with 8.5% of the Russian population, the Urals Federal District produces 16.0% of gross domestic prod-

uct and 20.0% of all industrial products in Russia. Besides, the District submits about 42.0% of taxes to the federal budget. The Urals is the richest region in natural resources of the Russian Federation.

It has almost 2/3 of all known Russian oil deposits (65.5%), 1/6 of iron ore, almost 10.0% of timber resources, around 75.0% of known gas resources and 56.5% of gas condensate, 4.5% of non-ferrous metals. The Urals produces around 40.0% of Russian steel and rolled ferrous metals, 45.0% of refined copper and 40.0% of aluminum, almost 10.0% of all domestic engineering equipment. Concentration of industrial manufacturing in the Urals is 4 times higher than Russian average. The region economy comprises fuel and energy complex, metallurgy and machine-building. Regions of the Company's service area possess significant mineral resources and are characterized by a high level of industry development, growing investment attractiveness. The regions also possess a significant scientific and technical potential as well as developed infrastructure and highly-skilled workers

Geopolitical situation (regions are between Europe and Asia) creates favorable conditions for economic and cultural development. There are railroads, air routes and highways, including Trans-Siberian line. The density of highways and railroads exceeds the Russian average. There are plenty of large plants, factories and power stations. Regional development is mainly determined by ferrous and non-ferrous metallurgy, machine-building, fuel and energy complex, agricultural and chemical complexes. Each region is self-sufficient in economic and financial potential.

#### **Aims of the Issuer's creation:**

- 1) Implementation of state policy in energy sector;
- 2) Creating condition for effective functioning of the regional distributive grid complex;
- 3) Efficient exploitation and centralized technological management of energy objects;
- 4) Implementation of united strategy in investment policy and fund raising for solving general development problems of distributive grid complex;
- 5) Elaboration and implementation of scientific and technical policy as well as implementation of progressive technologies and equipment;
- 6) Profit earnings.

#### **Strategic aims of the Company:**

Strategic aims are formulated on the analysis basis of opportunities, roles and potential of the Company, external factors, possibilities and threats for the Company's mission as well as the best domestic and international practices in exploitation of distributive grid complex.

Strategic aims of the Issuer are:

- Provision of system reliability and security to retain sustainable functioning of the regional DGC, to secure safe exploitation of main and additional equipment and constructions as well as to prevent threats for population;
- Sustainable development of quality and volume of provided services in energy transmission, ecology security that should result in increase of the Company's market value as well as simultaneous creation of infrastructure basis for economic development of the region;
- The Company's value growth supposing sustainable revenue increase, profitability growth, extension and qualitative renewal of the Company's asset portfolio, that should provide satisfaction of shareholder interests, make the Company and its objects attractive as well as enable to evaluate efficiency of resource use and management governance quality.

#### **The Issuer's mission:**

Effective usage and reliability maintenance of the Company's assets as well as raising investment resources to the benefit of each shareholder and the Company, on the whole.

Changes of revenues from core business lines equaling 10% and more in comparison to the corresponding reported period of the preceding year and reasons for the changes

*There were no such changes.*

*The main objectives of the Company are:*

- *energy transmission;*
- *operating technological management;*
- *connection to grids;*
- *collection, transfer and processing of technological information, including measurement and metering data;*
- *control over safe exploitation of consumers' energy objects connected to the Company's grids;*
- *grids exploitation;*
- *performance of the powers of the sole executive body of economic entities;*
- *fiduciary property management;*
- *operations with securities in the procedure stipulated by the current Russian legislation;*
- *agent operations;*
- *design and estimate, exploration, scientific, research and constructing operations;*
- *forwarding services;*
- *consulting and information services;*
- *performance of activities determining conditions of parallel operations in accordance with regimes of the United energy system of Russia within contracts;*
- *exploitation of energy objects (that are not on the Company's balance) according to contracts concluded with owners of such objects;*
- *provision of efficiency and operability of energy objects in accordance with the current normative requirements, maintenance, diagnostics, repair of grids and other energy objects;*
- *testing and measurement of energy objects (including objects belonging to consumers);*
- *provision of efficiency and operability, maintenance, diagnostics, repair of technological communication networks, measurement and metering gadgets, relay protection equipment and stability control scheme, other technological equipment related to grid functioning;*
- *elaboration of long-term forecasts, perspective and current plans for grid development, target complex scientific, technical, economic and social programs;*
- *development of grids and other energy objects, including design, engineer exploration, construction, reconstruction, update, mounting and checkout;*
- *development of technological communication networks and telematics, measurement and metering gadgets, relay protection equipment and stability control schemes, other technological equipment related to grid functioning, including design, exploration, construction, reconstruction, update, mounting and checkout;*
- *exploitation of explosive, chemically and fire hazardous production facilities;*
- *creation and mastering of new equipment, mechanisms and technologies ensuring efficiency, fire, production and ecological safety of facility operations, creation of conditions for developing Russian energy sector, implementation of industry scientific and innovation programs, participation in establishing industry R&D funds;*
- *control over safety of dangerous production facilities;*
- *provision of labor protection;*
- *liquidation of technological violations on grid objects;*
- *nature-protecting operations;*
- *operations related to environmental impact, creation, collection, usage, deactivation, storage, burial, transfer, transportation and arrangement of industrial waste;*
- *water management;*
- *natural resources management, including mineral and forest resources;*
- *metrology operations;*
- *production and repair of measurement gadgets;*
- *mounting, repair and maintenance of equipment and instruments for measurement, control, testing, navigation, location and other purposes;*
- *dangerous waste management;*
- *fire prevention and fighting;*

- mounting, repair and maintenance of in-door fire safety gadgets;
- HR management, including training and development, knowledge testing in technical exploitation, fire safety and labor protection as well as other rules and instructions in accordance with the current normative documents;
- passenger and cargo transportation by vehicles, railroads, air planes and water transport (including dangerous cargo);
- maintenance and repair of railroad transport;
- maintenance and repair of railroad equipment;
- cargo handling railroad operations (including dangerous cargo);
- cargo handling water operations (including dangerous cargo);
- exploitation, maintenance and repair of vehicles, railroad, air and water transport as well as lifting machines utilized for technological purposes;
- foreign economic affair;
- storage of oil, gas and derivatives;
- operations as a client-developer;
- design of buildings and facilities with Responsibility Levels I and II according to the state standards;
- construction of buildings and facilities with Responsibility Levels I and II according to the state standards;
- local, intrazone and long-distance telecom services;
- communication channel lease;
- telematics (including e-mail, access to information resources, enquiry service, Telefax, Comfax, Burofax, message processing, voice messages, voice transfer services);
- data transmission;
- usage of orbital frequency resources and radio frequency for TV and radio broadcasting (including broadcasting of additional information);
- rental of buildings, constructions, equipment, machines and mechanisms;
- security services, just for own safety, within internal security service guided by the Federal Law "On private detective and security activities in Russia";
- technical protection of confidential information;
- activities in mobilization preparation, civil defense, emergency prevention and liquidation;
- state secret protection, operations with top-secret information, according to the Russian legislation and other normative documents;
- trade secret safety and protection;
- purchase (generation) of energy on wholesale energy market and from retail producers used for resale on retail market in case guarantee supplier status is assigned as is set forth by the Russian legislation;
- sale of energy on retail market in case guarantee supplier status is assigned as is set forth by the Russian legislation;
- medical services, including sanatorium-resort services;
- education and training services;
- exploitation and maintenance of objects controlled by the Russian Technical Supervising Agency;
- other operations, non-prohibited by the federal legislation.

Seasonal character of the Issuer's business

**Core business is of seasonal character. Revenues increase in autumn and winter due to decrease of daylight hours and increase of energy consumption**

Overall expense structure of the Issuer

Indicators	9M 2010
Raw materials and supplies, %	2.18
Purchased component parts, semi-finished inventory, %	0
Production works and services rendered by external companies, %	5.28
Fuel, %	0
Energy, %	0.21
Wages, %	10.08
Interest payable, %	0

Rental payments, %	0.76
Social benefits, %	2.28
Fixed assets depreciation, %	5.98
Taxes included into product costs, %	0.27
Other expenses	72.9
Obligatory insurance payments, %	0
Infrastructure payments,%	69.14
Travel and hospitality costs, %	0.15
Expenses on labor and services provided by external companies,%	3.61
Other expenses	0.06
Total: expenses on production and sale of goods (works, services), %	100
For information: Revenue from services, %	127.3

New goods (works, services) of significant importance, status of development of such goods (works, services): *None*

Standards (rules), according to which our financials are prepared and calculations are done in this item of the quarterly report:

### 3.2.3. Raw materials and suppliers of the Issuer

#### As of the reported quarter

Suppliers of the Issuer that provide no less than 10% of all raw material supplies

Full name: *Closed Joint-Stock Company Industrial Group “Promindustriya”*

Location: *Saint Petersburg*

TIN: *7826740795*

PSRN: *1027810275294*

Share in overall supplies, %: *0.22*

Full name: *Limited Liability Company “Urals Center for Labor and Energy Serviceman Protection”*

Location: *16 Ulitsa Kominterny, Ekaterinburg, 620087*

TIN: *6670249153*

PSRN: *1096670007529*

Share in overall supplies, %: *0.79*

Information on price fluctuations on raw materials and goods for more than 10% during the reported period in comparison to the corresponding reported period of the preceding year

*There were no price fluctuations for raw materials and goods during the reported period*

Import share in supplies of raw materials and goods, forecast for availability of import sources in future and possible alternative sources

*There are no import deliveries*

### 3.2.4. Market outlets of the Issuer

Main markets where the Issuer operates:

OAo “IDGC of Urals” renders services on energy transmission to subjects of wholesale and retail energy markets as well as technological connection of legal entities and natural persons to grid complex in Sverdlovsk, Chelyabinsk and Perm region.

The Issuer operates as a natural monopolist regulated by the state in terms of tariffs on energy transmission and technological connection. Energy transmission services are rendered to suppliers of last resort, independent energy suppliers and direct consumers – participants of whole sale energy market. OAO “IDGC of Urals” possesses a dominant position on energy transmission markets in the service area. This market constantly expands due to energy consumption growth, on the whole, as well as connection of new consumers. Competitors in energy transmission services are allied municipal and private network companies possessing mainly grids of low voltage class. Thus, in UDGCU’s service area there are 286 allied grid companies (including plants rendering services on energy transmission to sub-consumers), the number of large ones reaching 30. “Smaller” market participants directly depend on OAO “IDGC of Urals” that adheres to the policy of consolidating all grid assets in its service area.

In terms of C.U.<sup>1</sup> we occupy 50% of communal energy market.

In terms of C.U. Permenergo branch occupies 53%, Sverdlovenegero - 42%, Chelyabenergo - 59%.

**IDGCU's market share in terms of c.u.**

**Sverdlovenegero market share in terms of c.u.**

**Permenergo market share in terms of c.u.**

**Chelyabenergo market share in terms of c.u.**

In terms of productive supply to final consumer, the Company's share on the communal energy market reaches 70%.

The share of productive supply to final consumer is as follows:

- Permenergo branch - 82%,
- Chelyabenergo branch - 66%,
- Sverdlovenegero branch - 65%,

Factors that can negatively influence the sales of the Company and possible measures taken by the Issuer to diminish such influence:

The following factors can negatively affect the volume of energy transmission:

1. Malfunction of grid equipment and, as a consequence, increase of consumer curtailment;
2. Limitations or absence of technical opportunity to connect new consumers;
3. High losses as a result of unmetered energy consumption, mismetering, deterioration of technical status and load in grids.

To decrease the influence of the factors we take measures to increase reliability, to develop grids, to decrease technical and commercial losses in our grids, to optimize metering system as well as cooperation with the regional authorities on development plan elaboration. Main risks lie in expansion of territories served by allied grid companies resulting in decrease of the Company's service area and service sale market.

Strategic aim of the Company is to consolidate grid municipal complexes with the Company's grids for creation of united grid area in the service area.

**Creation of united grid area on the Company's assets shall:**

1. Liquidate unfair territorial grid companies that, in its turn, shall lead to a more transparent regional tariff model and decrease of tariff burden on our consumer.
2. Optimize productive processes;
3. Lead to decrease in operating expenses of the Company.
4. Enable simultaneous arranging and agreement of development plans for energy system and communal energy sector..
5. Ensure a more thorough control over load growth and timely measure-taking on changing grids and new equipment deployment.

Implementation of united grid area strategy is carried out by concluding lease agreements, acquisition of grid complexes as well as acceptance of no man's grid objects situated in municipal institutions into possession, maintenance and exploitation.

**3.2.5. Information on the licenses issued to the Issuer**

License authority: *Russian Federal Security Service, Sverdlovsk branch*

<sup>1</sup> Conventional unit of equipment characterizing property complex of the company used for energy transmission.

License number: **B 351000**  
Activities: **Measures and/ or services for state secret protection**  
Issued: **05.05.2008**  
Expires: **05.05.2011**

License authority: **Russian Federal Security Service, Sverdlovsk branch**  
License number: **B 350999**  
Activities: **Working with state secret information**  
Issued: **05.05.2008**  
Expires: **05.05.2011**

Activities: ***Construction of Responsibility Level 1-2 buildings and facilities in compliance with the state standard***

Issued: **28.12.2008**

Expires: **29.12.2013**

### **3.2.6. Joint ventures of the Issuer**

***The Issuer does not arrange joint ventures with other companies.***

### **3.3. Future plans of the Issuer**

OAO "IDGC of Urals" is one of the largest energy companies in the Urals arranging functioning of distributive grid complex in Kurgan, Sverdlovsk, Chelyabinsk and Perm regions. In accordance with the aims of the energy sector restructuring and its Charter the Company's aims are:

1. Implementation of state policy in energy sector;
2. Creation of conditions for effective functioning of the regional DGC;
3. Effective exploitation and centralized technological management of grid objects;
4. Implementation of united strategy in investments and fund raising for reaching system-wide purposes of DGC development;
5. Elaboration and implementation of scientific and technical policy and introduction of new progressive types of technologies and equipment;
6. No-break and reliable energy supply to consumers in the service area and profit acquisition.

#### **Provision of reliable and sustainable performance of the Company is reached due to:**

1. Overcoming of ageing of the Company's fixed assets, change of obsolete equipment and usage of cutting-edge technologies, equipment, materials (110-220 kV SF6 circuit breakers, 10 kV vacuum switchers, self-supported isolated wire on 0.38 kV aerial line, overload limiters, low-maintenance batteries, polymer insulator, etc.)
2. Decrease of energy losses due to regulating voltage in 6-10 kV networks, putting non-loaded transformers into reserve, unload overloaded lines, increase carrying capacity of grids due to reactive power management.
3. Improvement and increase of quality in maintenance, decrease of quantity and length of disconnections by implementing new technologies.
4. Monitoring current power equipment and implementation of modern methods and testing and diagnostic gadgets (including thermal control, no-break control of cable insulators).

5. PS reconstruction with increasing transformer capacity.
6. Implementation of cutting-edge communication and telematics gadgets, IT development.
7. Renewal of special-purpose vehicles and mechanisms.
8. Application of new information technologies while managing grids on SAP 6.0 platform.
9. IDGCU grids development is based on “Energy sector development schemes” of the service area elaborated taking into account development plans of all energy system participants and load increase forecast.

**Main principles forming the basis for the Company’s strategy in perspective development of the grids are stated below:**

1. Energy demand satisfaction and creation of energy reserves to be ahead of regional development.
2. Provision of quality and reliable energy supply.
3. Construction of new supplying centers.
4. Unloading of existing transits.
5. Radial axial grid structure.
6. Limitation of energy voltage class applied to 35 kV and transition of grids to higher voltage classes.
7. Development of 110 kV for transmission and distribution of power from 220 kV PS and electric stations;
8. Implementation of new cutting-edge equipment.

**Main directions of the Company’s grid development are:**

Connection of new consumers to the Company’s grids with a view to provide development of the Urals economy and to increase volume of services on energy transmission.

2. Construction of energy objects to liquidate energy voltage deficit areas and provision of reliable and sustainable energy system performance.
3. Creation of united energy grid area, i.e. consolidation of energy assets on the service area to provide reliable energy supply as well as creation of opportunities for developing regional territorial energy systems.
4. Development of industrial complex shall enable to implement federal programs, national projects, regional programs and territory development plans.

OAO “IDGC of Urals” elaborated target programs, fundamental for long-term programs of the Company’s grid development:

1. Overall reconstruction of PS 35-110 kV, reconstruction of TP, RP 6-10/0.4 kV;
2. Reconstruction of 35, 110 kV, 0.4-10 kV aerial lines, reconstruction of 0.4-10 kV cable lines;
3. Replacement of 35-110 kV oil switches for air-free and SF6 circuit breakers, changes of 6-10 kV oil switches for air-free ones;
4. decrease of “close” energy centers;
5. New construction of PS-35-110 kV, 35-110 kV lines, grids construction;
6. Reactive capacity compensation;
7. IT infrastructure development;
8. Metering system development;
9. Communications and ACS development;
10. RPA device development;
11. Replacement of current transformers and 35-110 kV voltage transformers, change of aerial fuses for overvoltage limiters, replacement of high-voltage transformer leads, replacement of OLTC, replacement of CP devices for switches, replacement of accumulator batteries;
12. High-voltage laboratories update;
13. Client support centers development;
14. Automation of business processes and financial activities;
15. Implementation of the ecology policy;
16. Improvements in labor protection.

Currently, in accordance with Government Decree #977 dd. 01.12.2009, we elaborated a long-term 2011-2015 investment program (being in the process of approval in Russian Ministry of Energy and regional Authorities) to form RAB tariff. According to it, new construction and reconstruction includes 4358 MVA of transformer capacity and 7753 km of lines (of various voltage) till 2015.

### **3.4. Participation of the Issuer in industrial, bank and financial groups, holdings, concerns and associations**

Name of a group, holding, concern or association: *The Issuer participates on group of companies belonging to OAO “IDGC Holding”*

Participation: *since 2008*

Place and functions of the Issuer:

Being a subsidiary company of OAO “IDGC Holding”, the Issuer plays an important role in forming energy industry in Russia in terms of grid complex and is focused on the functions below:

- Implementation of united energy policy realized by the Russian government and OAO “IDGC Holding” on the regional level;
- Provision of reliability of grid performance;

- Implementation of long-term investment programs in energy industry;
- Prevention of incidents in industry;
- Creation of favorable conditions for consumers and shareholders.

### 3.5. Subsidiary and associated companies of the Issuer

Full name: *Open Joint-Stock Company Ekaterinburg Electric Grid Company*

Short name: *EESK, OAO*

Location: *1 B. Eltsyna Ulitsa, Ekaterinburg, Russia, 620014*

TIN: *6658139683*

PSRN: *1026602312770*

Subsidiary Company: *Yes*

Associated company: *No*

Grounds upon which the company shall be deemed the Issuer's subsidiary: **prevailing share of the Issuer in the Charter Capital of the given company**

Share of the subsidiary's Charter Capital owned by the Issuer, %: *91.04*

Share of the subsidiary's ordinary shares owned by the Issuer, %: *91.04*

Main business line of the subsidiary company. Significance of the subsidiary company for the Issuer's operation: *Energy transmission using line of 0.4-110 kW, development of grids in Ekaterinburg and connection of consumers to electric networks of OAO "EESK"*

The Board of Directors

### 3.6. Composition, structure and value of the Issuer's fixed assets, prospects of acquisition, replacement, retirement of fixed assets as well as all facts of fixed assets encumbrance

#### 3.6.1. Fixed assets

As of the reported period

Measurement unit: *RUR thous.*

Fixed assets	Initial (replacement) value	Depreciation
Buildings	40 777 637	22 859 697
Power equipment	35 696 163	27 213 839
Furniture and production equipment	156 015	108 628
Other main assets	585 073	398 848
Total	77 214 888	50 581 012

Information on methods of depreciation contributions:

*According to the accounting policy of the Issuer depreciation is charged linearly basing on the useful life of the objects.*

Reported period: *30.09.2010*

Results of the last revaluation of fixed assets and long lease fixed assets performed for the last 5 completed financial years preceding the reported period or for each completed financial year preceding the reported period if the Issuer operates less than 5 years and as of the reported quarter

**There was no asset revaluation as of the reported period**

Plans on acquisition, replacement, retirement of fixed assets with the value equaling 10% and more of the Issuer's fixed assets value and other fixed assets as well as information on fixed asset encumbrance as of the reported period:

*The Issuer does not plan acquisition, replacement and retirement of fixed assets with the value equaling 10% and more of the Issuer's fixed asset value.*

## IV. Information on financial and business performance of the Issuer

### 4.1. Financial and operating results

#### 4.1.1. Profit and losses

Measurement unit: *RUR thous.*

Indicator	9M 2009	9M 2010
Revenues	29 820 741	12 424 601
Gross profit	3 539 221	2 664 632
Net profit (non-distributed profit (uncovered loss))	604 299	1 250 725
Return on Equity (ROE), %	2.17	4.09
Return of Assets (ROA), %	1.47	2.35
Net margin, %	2.03	10.07
Operating margin, %	11.87	21.45
Capital turnover	0.84	0.35
Uncovered loss as of the reported period	0	0
Uncovered loss (as of the reported period)/ Total balance	0	0

Economic analysis of the Issuer's cost effectiveness based on the dynamics of indices. Reasons for profit/loss shown in the financial statement:

**3Q 2010 revenues increased on 3Q 2009 due to consumption increase and improvement of overall economic situation in Russia.**

#### 4.1.2. Factors that influenced the amount of revenues and profit (loss) from the main business lines

**3Q 2010 revenues increased on 3Q 2009 due to consumption increase and improvement of overall economic situation in Russia.**

## 4.2. The Issuer's liquidity, capital adequacy and current assets

Measurement unit: *RUR thous.*

Indicator	9M 2009	9M 2010
Own circulating assets	-5 261 861	-3 560 357
Permanent Capital Asset Ratio	1.19	1.12
Current liquidity ratio	1.43	1.26
Quick liquidity ratio	1.21	1.05
Internal resources autonomy ratio	0.68	0.7

Economic analysis of liquidity and paying ability:

*Non-current assets prevail in the asset structure (81%). It is common for grids to have a high share of non-current assets. These circumstances explain negative values of own circulating assets that is typical for all IDGCs.*

*Liquidity ratios comply with the normative level and demonstrate the ability to discharge short-term obligations.*

*Autonomy ratio characterizes the share of own assets channeled to form the Company's property and demonstrates the level of dependency from external financing. This indicator is on a considerably high level, thus demonstrating that the Issuer is almost independent from external financing. Opinions of the Issuer's managing bodies regarding the factors that lead to changes in liquidity and paying capacity coincide. The BoD members do not have special opinions with regard to the factors.*

## 4.3. Amount and structure of capital and current assets

### 4.3.1. Amount and structure of capital and current assets

Measurement unit: *RUR thous.*

Indicator	9M 2010
Amount of the Charter Capital	8 743 049
Overall value of own stock repurchased by the Issuer to be sold afterward	0
Share of own stock repurchased by the Issuer of overall amount of placed shares (Charter Capital)	0
Capital reserves	96 121
Earned Capital	17 009 503
Retained Net Profit	4 616 133
Total capital	30 464 806

**The amount of the charter capital stated herein corresponds to the Issuer's founding documents**

Structure and amount of current assets of the Issuer in accordance with the Issuer's financial statements

Indicator	9M 2010
Total current assets	7 811 029
Materials and inventories	1 253 481
Input value-added tax	31 534
Accounts receivable (more than 12 months after the reported period)	91 165
Accounts receivable (within 12 months after the reported period)	4 989 102
Short-term financial investments	20 000
Cash and equivalents	1 425 747
Other current assets	0

Resources for financing current assets

*The resources for financing current assets are own funds, accounts payable and bank loans*

The Issuer's policy on financing current assets as well as factors that can cause changes in the policy and evaluation of occurrence probability:

*The Issuer's policy focuses on optimizing the amount and composition of financial resources, taking into account ef-*

*fective usage of own resources and sufficient financial stability*

#### 4.3.2. Financial investments of the Issuer

As of the reported period

The list of financial investments of the Issuer which comprise 10% and more of its financial investments as of the end of the reported period

Investments to issued securities

Type of securities: *shares*

Full name of the Company that issued the securities: *Open Joint-Stock Company Kurganenergo*

Short name: *Kurganenergo, OAO*

Location: *40, Ulitsa Lenina, Kurgan, Russia*

State registration date	Registration number	Authority
22.11.2003	1-01-00069-A	FSC of Russia

Number of securities owned by the Issuer: *78 887 994*

Total nominal value of the securities owned by the Issuer, RUR: *78 887 994*

Total book value of the securities owned by the Issuer: *1 185 413 596.95*

**There are no preferred shares. There were no 2007-2009 dividends announced and paid out by OAO "Kurganenergo"**

Type of securities: *shares*

Full name of the Company that issued the securities: *Open Joint-Stock Company Ekaterinburg Electric Grid Company*

Short name: *EESK, OAO*

Location: *1 Borisa Eltsyna Ulitsa, Ekaterinburg, Russia*

State registration date	Registration number	Authority
16.04.2002	1-01-65011D	FSC of Russia

Number of securities owned by the Issuer: *1 080 000 000*

Total nominal value of the securities owned by the Issuer, RUR: *1 080 000 000*

Total book value of the securities owned by the Issuer: *933 088 204.7*

**There are no preferred shares. As for 2008 dividend payout, there were dividend payments in the amount of RUR 12 960 000.0 or RUR 0.012 per ordinary share**

Investments to non-issued securities

**There are no investments to non-issued securities comprising 10% and more of all financial investments**

Other financial investments

**There are no other financial investments comprising 10% and more of all financial investments.**

Information on the amount of potential losses related to bankruptcy of the companies in which the Issuer invested:

Information on losses is submitted according to financial investments shown in the Issuers statements as of the beginning of the reported period and up to the end of the last reported quarter

Standards (rules) of accounting statements in accordance with which the Issuer made calculations shown at the present item of the report:

**Decree of the Ministry of Finance #126n dd. 10.12.2002 "On approval of regulations on accounting "Accounting financial investments" PBU 19/02"**

#### 4.3.3. Non-tangible assets of the Issuer

As of the reported period

Measurement unit: *RUR*.

Intangible assets	Initial (replacement) value	Depreciation
Patents, licenses	108	24

Standards (rules) of accounting statements in accordance to which the Issuer discloses information on its intangible assets:

**According to item 3 PBU 14/2007 "Accounting of intangible assets", intangible assets are the following assets meeting**

*the following conditions:*

- *the object is able to bring economic benefits in future, in particular, the object is designed for usage while producing, rendering services, for management needs of the company;*
- *the company is entitled to gain economic profits, which the object can produce in future (the company has proper documents supporting the asset existence and rights of the company to the intellectual results or individuality facilities - patents, certificates, other protective documents, contract on alienation of exclusive right to intellectual results or individuality facilities, documents supporting transition of exclusive right without contract, etc.) as well as limitations to access of other persons to economic benefits;*
- *possibility of detachment or separation (identification) of the object from other assets;*
- *the object is designed for long-term usage, i.e. useful life with duration of more than 12 months or usual operating cycle if it exceeds 12 months;*
- *the company does not intend to sell the object within 12 months or usual operating cycle if it exceeds 12 months;*
- *real (initial) value of the object can be significantly determined;*
- *the object lacks physical composition.*

*A joint-stock company does not recognize objects as intangible assets with regard to which, while reflecting them in the accounting records (during qualification), there is a decision to alienate them to the benefit of other persons – resale, swap, etc. are intended. In this case the object is qualified as goods. To intangible asset objects one can refer the ones created or purchased according to the following contracts:*

- *exclusive right of patentee to inventions, industrial samples, useful models;*
- *exclusive rights of certificate holder to trade mark, service mark, place of goods origin;*
- *exclusive copyright to PC programs, data bases;*
- *scientific, literature works and works of art;*
- *know-hows;*
- *goodwill appeared due to the purchase of a company as a property complex (on the whole or as a part)*

*Intangible assets are reflected in the accounting records according to their initial value determined by the reason of their appearance (purchase, own creation, acceptance as a stock in the charter capital, etc.). The cost of intangible assets, according to which they were reflected, cannot be changed except for the cases stipulated by the Russian legislation.*

*There is no revaluation of intangible assets according to the current market price. Initial cost of purchased goodwill is determined by calculations as a margin between the purchase price, paid to the seller while acquiring the company as a property complex (on the whole or as a part) and the sum of all assets and liabilities according to the balance as of the purchase (acquisition) date.*

*Positive goodwill should be viewed as a bid paid by a buyer anticipating future economic benefits due to purchased non-identified assets and should be reflected as a separate inventory item.*

*Negative goodwill should be viewed as a price allowance given to a buyer due to the lack of constant buyers, quality reputation, marketing and sales skills, business contacts, management experience, level of personnel qualification, etc. Negative goodwill is reflected as financial results (other revenues).*

*The sum of depreciation on intangible assets is determined by norms calculated from the initial price and useful life (linear method).*

*Useful life is determined by an expert commission and is approved by the CEO of a company (or by a special person authorized for such activities) while reflecting an object in accounting documents, basing upon the following statements:*

- *according to rights, acquired by patents, certificates and other similar protective documents, containing validity terms or terms stipulated by legislation – basing upon the terms set forth in the document;*
- *according to rights acquired by author's contracts, concession contracts and other similar contracts containing certain validity terms for acquired intangible assets – basing upon terms stipulated by such contracts;*
- *according to other objects of intangible assets – basing upon expected terms of object use during which a joint-stock company gain economic benefits from the assets;*
- *according to intangible assets objects, useful life of which cannot be determined, depreciation is set forth on a 20-year basis (but no longer than the longevity of property complex related to the asset);*
- *the useful life of goodwill and arrangement expenses is set on a 20-year basis (but no longer than the longevity of property complex related to the asset).*

*Depreciation is charged every month on a special account "Depreciation of intangible assets". Depreciation charge cannot be stopped, besides conservation of property complex related to the asset on the whole. Use of intangible asset objects for production, service rendering or for management purposes is terminated due to:*

- *termination of validity of a company's right to intellectual results or individuality facilities;*
- *transfer, according to alienation contract, exclusive right to intellectual results or individuality facilities;*
- *transfer of exclusive right to other persons without contract (including according to the procedure of universal legal*

*succession and during execution upon this intangible asset);*

- *termination of usage caused by moral depreciation;*
- *transfer as a share to the charter capital of other company, share fund;*
- *transfer according to contract of swap, donation; a share in joint venture;*
- *revelation of asset deficiency during inventory;*
- *in other cases.*

*In case the object is retired, its price is subject to writing-off during corresponding period. The retirement is reflected according to residual cost in a procedure set forth for fixed assets.*

#### **4.4. Information on policy and expenses of the Issuer on sci-tech development, licenses and patents, new developments and researches**

The Issuer obtained the objects of intellectual property by the transfer act from Sverdlovenego, OAO since it was merged into the Issuer.

As of 30.06.2010, the Issuer has legal protection for 16 intellectual property objects (patents), including 3 patent in force, 8 patents that ceased to be in force due to their expiry (but they are still under legal protection)

##### **1. IZ 2168514 A method for obtaining inhibitor of mineral salting**

Application: 2000114153/04 Application date: 2000.06.06

Starting date: 2000.06.06

Owner of the Patent: Sverdlovenego, OAO

Status: as of 30.06.2010 it can cease to be in force

##### **2. N 2218999 A method for application of fluorinated surface-active agents on antifriction bearing**

Starting date: 29.05.2002

Owner of the patent: Sverdlovenego, OAO

Status: as of 30.06.2010 it may cease to be in force

##### **3. IZ 2224578 A method for defining impurity of mechanical filter by metal compounds**

Application: 2002119049/28, Application date: 15.07.2002

Starting date: 15.07.2002

Owner of the patent: Sverdlovenego, OAO

Status: as of 30.06.2010 it may cease to be in force

##### **4. IZ 2218499 Axle-box for adjusting valve**

Application: 2001126029/06 Application date: 2001.09.24

Starting date: 2001.09.24

Owners of the patent: Stanislav Vasilyevich KUZMIN, Vladimir Afanasyevich SINTSOV, Sverdlovenego, OAO

Status: as of 30.06.2010 it ceased to be in force but can be renewed

##### **5. IZ 2234610 Two-port valve with internal stabilizer**

Application: 2001133510/06 Application date: 2001.12.07

Starting date: 2001.12.07

Owners of the patent: Vladimir Afanasyevich SINTSOV, Sverdlovenego, OAO

Status: as of 30.06.2010 it ceased to be in force but can be renewed

##### **6. IZ 2113754 A method for controlling press-work of stator core**

Application: 96118850/09 Application date: 1996.09.20

Owner of the patent: Sverdlovenego, OAO

Status: as of 30.06.2010 it ceased to be in force but can be renewed

##### **7. IZ 2155429 A method for controlling press-work of stator core**

Application: 99120899/09 Application date: 1999.10.05

Starting date: 1999.10.05

Owner of the patent: Sverdlovenego, OAO

Status: as of 30.06.2010 it ceased to be in force but can be renewed

##### **8. IZ 2212751 A method for controlling press-work of stator core of synchronous machine**

Application: 2001127071/09 Application date: 2001.10.04

Starting date: 2001.10.04

Owner of the patent: Sverdlovenego, OAO

Status: as of 30.06.2010 it ceased to be in force but can be renewed

**9. N 2154518 A method for gas scrubbing and operating device**

Starting date: 13.10.1998,

Owner of the patent: Sverdlovenego, OAO

Status: as of 30.06.2010 it ceased to be in force but can be renewed

**10. N 2153920 A method for gas scrubbing and operating device**

Starting date: 10.11.1998,

Owner of the patent: Sverdlovenego, OAO

Status: as of 30.06.2010 it ceased to be in force but can be renewed

**11. N 2207560 A method for controlling impurity of ion exchanger**

Starting date: 08.11.2001

Owner of the patent: Sverdlovenego, OAO

Status: as of 30.06.2010 it ceased to be in force but can be renewed

**12. IZ 2155401 A method for drying high voltage wire covering**

Application: 99108324/09, 13.04.1999

Starting date: 13.04.1999,

Owner of the patent: Sverdlovenego, OAO

Status: as of 30.06.2010 it ceased to be in force

**13. IZ 2196234 Regulating grid valve with gearing**

Application: 2001104783/06 Application date: 2001.02.20

Starting date: 2001.02.20

Owners of the patent: Vladimir Afanasyevich SINTSOV, Sverdlovenego, OAO

Status: as of 30.06.2010 it ceased to be in force

**14. IZ 2132106 device for electric system control**

Application: 97117198/28, 20.10.1997

Owner of the patent: Sverdlovenego, OAO

Status: as of 30.06.2010 it ceased to be in force.

**15. IZ 2155270 A method for composition check of cutout and adjusting valves of steam turbine**

Application: 99106027/06, 24.03.1999

Starting date: 24.03.1999

Owner of the patent: Sverdlovenego, OAO

Status: as of 30.06.2010 it ceased to be in force

**16. IZ 2185009 A method for recovery of nickel cadmic batteries and operating device**

Application: 2000114154/09, 06.06.2000

Starting date: 06.06.2000

Owner of the patent: Sverdlovenego, OAO

Status: as of 30.06.2010 it ceased to be in force but can be renewed

There are no money paid for prolongation of the patents. Risk factors related to a possibility of the expiration of patents or trade mark licenses – The Issuer's top-management decided not to prolong the patents since they have nothing to do with production technology used by IDGC of Urals, OAO.

**The list of useful models that are not used:**

- 1 UM 10112 A device for gas scrubbing
- 2 UM 10880 A measuring device for generator reverse active power
- 3 UM 11890 A measuring device for turbo generator reverse active power
- 4 UM 11895 A device for defining the water impurity level
- 5 UM 17730 A controlling device for hermiticity pipe coupling
- 6 UM 19659 An adjusting grid valve with gearing
- 7 UM 22235 A controlling device for checking geometrical form of metal reservoir walls with external covering
- 8 UM 21847 Ringing generator of user unit condensation
- 9 UM 23939 A diffusing device for adjusting valve
- 10 UM 29865 A device for glazing temperature tracks for turbine rotor
- 11 UM 35012 Electric and mechanical vibration exciter
- 12 UM 15312 Plate shears
- 13 UM 15425 A device for recovering nickel cadmic battery
- 14 UM 9101 A device for condenser charging

- 15 UM 14159 A cutting device for coiled material
- 16 UM 14165 A glazing device for gate seats
- 17 UM 14263 A blanking operations device for sealing ring made of elastic graphite
- 18 UM 14287 A batch box for hard-running materials
- 19 UM 22975 A two-port valve with internal stabilizer

#### 4.5. Trend analysis of the core business of the Issuer

Historically energy sector plays an important role for the Russian economy. Being a constituent part of fuel and energy the sector corrects the development of all spheres and serves as an indicator for economic stability in the country.

Nowadays main peculiarity of energy sector development is a transition from negative tendencies in energy consumption appeared in 1990-s to energy consumption increase tendency appeared in 1999. Energy consumption increase and production increase coincided and this enables us to speak of the tendency stability and, as a consequence, of the necessity to satisfy the growing demand for ensuring economic growth. In 4Q2008, due to global crisis, there is a decrease on energy consumption in metallurgy and machine-building.

The growth of industrial production was accompanied by increase of paying ability of the commercial consumers and this improved non-payment problems in the sector. In 2000-2002 payments for energy consumption reached 100%, earlier debts being paid or restructured. Financial crisis bears the risk of decrease in paying ability of consumers.

The growth of economy, alongside with accompanying structural shifts, sets a new goal for energy sector. The energy sector should be an infrastructure that is able to support the creation of new industrial capacities or expansion of the current ones where required. This goal shall demand a forced development of grids and technological structure in energy sector and increase of its flexibility.

Main development tendencies in 2002-2005 were:

1. Creation of infrastructural organizations of wholesale market: System operator –SO CDM UES, OAO, Company for managing UNES (FSK UES, OAO, Trade system administrator (NP ATS);
  2. Creation of generating, sales, grid companies;
  3. Start of free sector for wholesale trade on energy "5-15";
- Start of sector for wholesale trade on electric output.

Changes in regulatory environment are stated below:

1. Access to wholesale energy market (WEM) for generating companies and FSK UES, OAO since 01.01.2006. This caused the review of information exchange system between the market participants and toughening of requirements to energy accounting in gridcos.

2. Approval and enactment since 01.09.2006 of the Rules on wholesale and retail energy markets of transition period (Government Decrees #529 and 530 dd. 31.08.2006). Besides the change of the current system of WEM and clear perfection of all subjects of wholesale and retail markets these documents shall lead to changes in payments for gridcos' services and customer relations.

3. Changes in regulating charges for services rendered by FSK UES, OAO since 01.07.2006. Introduction of new principles of UNES price regulation enabled gridcos to accurately plan the volume and FSK' service charges for 2006-2008.

4. Changes in regulating charges for transmission services rendered by gridcos since 01.01.2008., double-rate tariff payment for the services – rate for network maintenance and rate for loss compensation;

5. Continuing work for setting uniform tariff for transmission services stipulated by the Federal Tariff Service and Russian Government required support of current and new "network boilers" in 2007. This scheme, aside from setting uniform tariff for transmission services requires contractual relations on energy transfer. In 2009 there are 2 network boiler schemes in gridcos of the Company's service area.

The following factors have a significant impact on the energy sector: reform velocity, namely readiness of regulatory environment, paying ability of consumers as well as technical status of main productive assets.

##### 4.5.1. Analysis of factors and conditions affecting Issuer's activities

Energy reform and a considerable level of state industry regulation (including tariff regulation) are the main factors having a considerable impact on the energy sector on the whole, the Issuer's activities and other companies in the service area as well as other participants of energy market.

The factors and conditions capable to influence the Issuer's activities are stated below:

- Overvaluation of contract demand volume planned at calculation of energy transmission services from the volume in forecasted balance of the Federal Tariff Service, consumer refusal to pay for the services according to contract demand due to energy consumption decrease;
- Decrease of real energy consumption in comparison to the planned levels which were taken for calculation of energy transmission tariffs;
- The FTS's approval of ultimate transmission tariffs that do not include required financial expenses for ensuring reliable and non-stop current activities of the Company as well as its further development;

- Incident increase due to depreciation of the Company's assets. Physical depreciation and technological aging of the fixed assets, toughening of requirements for reliability and fail-safety, increase of possible severe accidents as a result of energy object destruction - all this demands a special attention to the issues of reliability and security of assets.

These factors are constituent parts of overall development tendency of the energy market. In Issuer's opinion, they are capable to have a short-term impact on the Issuer's business in a mid-term perspective.

*Measures already taken by the Issuer and planned future measures for efficient usage of the factors and conditions.*

The Issuer currently implements active investment policy both to update old equipment, to develop grids as well as to launch of new objects.

The Issuer plans to invest in grids in its service area.

Measures taken by the Issuer and future measures to decrease negative effect from factors impacting the Issuer's activities:

In the Issuer's opinion, the following measures will be effective at present as well as future:

- Creation of conditions and prerequisites for investments into energy sector;
- Joint activities on adjustment of regional development plans for more accurate and precise energy sector development;
- Increase of regional energy sector efficiency;
- Creation of united grid area using integration of regional networks into the Company's networks to increase reliability of energy supply;
- Achievement of optimal economically reasoned level tariff for energy resources taking into account the balance of economic interests of energy companies and consumers.

*Significant events/factors that can have a very negative impact on a possibility to gain the same or even higher future results compared to the results of the last reported period. Possible occurrence of such events or factors.*

The FTS's approval of ultimate transmission tariffs that do not include required financial expenses for ensuring reliable and non-stop current activities of the Company as well as its further development. The Issuer evaluates the event occurrence possibility as a very high one.

*Significant events/factors that can improve business results and occurrence possibility as well as their duration.*

Significant events/ factors that can improve the Issuer's business are the above-stated factors influencing the sector on the whole. For more efficient functioning under new environment the Issuer needs to develop and implement: complex long-term programs of technical update and reconstruction, including increase in capacity, flexibility and manageability of equipment operating mode, technological processes automation and new technology implementation. These measures will enable to prevent threats regarding depreciation and aging of the Company's equipment decreasing possibility of incidents occurrence and increase operating efficiency of the current facilities.

#### **4.5.2. The Issuer's competitors**

Gridcos occupy a dominant position in energy transmission on their service areas. Their market share reaches 90–95% on high voltage and 20–70% on low voltage. As of 2007 the share has not significantly changed but still there is a slight increase of the Company's share on low voltage due to acquisition of allied grids. The Company's competitors in energy transmission are allied municipal and private gridcos. Thus, in the Company's service area there are about 250 allied gridcos (including industrial enterprises rendering services for subconsumers). Among the largest are: Ekaterinburg Electric Grid Company, OAO (a SAC of Sverdlovenenergo, OAO); Regional Grid Company, OAO; Sverdlovsk Railroad, OAO (a branch of Russian Railroads, OAO); Oblkommunenergo, GUP SO; Tagilenergoseti, ZAO; Lukoil-Energogaz, OOO; KES-Prikamye, OAO; Energosbyt; SC Contact, OOO, Chelyabinskaya Electrosetevaya Kompaniya, OOO, Oblastnaya Setevaya Kompaniya, OOO (Chelyabinsk), Yuzhno-Uralskaya Railroad—branch of RZHD, OAO.

Policy with regard to competitors lies in subsequent M&A of the competitors. Besides, there are 2 direct contracts in the Company's service area:

- between Transneftservice-S, OAO and FSK UES, OAO (Chelyabinsk region),
- between EK Vostok, OAO (consumers - Corporation VSMPO-AVISMA, OAO, Severskyi Tube Plant, OAO) and FSK UES, OAO (Perm and Sverdlovsk regions)

Still, according to the contracts, the consumption volume is not high. All other consumers, connected to UNES are served by the Company according to the property lease contracts on "last mile equipment usage" drawn with FSK UES, OAO.

## **V. Detailed information on persons being members of management and control bodies of the Issuer and brief overview on the personnel**

### **5.1. Information on structure and competence of the managing bodies of the Issuer**

Full structure of the managing bodies and their competence in accordance with the Charter (founding documents): In compliance with item 9.1., article 9 of the Charter managing bodies of the Issuer are:

- **General Shareholder Meeting**, a supreme managing body
- **Board of Directors**, body executing general management of the Issuer's activities

- **Management Board**, a collegiate executive body
- **General Director**, sole executive body

**The competence of general shareholder meeting is stated in article 10 of the Charter:**

“The following issues shall pertain to the GSM reference:

- 1) Introduction of amendments and supplements to the Charter or approval of a new version of the Charter;
- 2) The Company’s re-organization;
- 3) The Company’s liquidation, appointment of a liquidation commission and approval of interim and final liquidation balance-sheets;
- 4) Definition of quantity, nominal value, category (type) of authorized shares and the rights provided by the shares;
- 5) Increase of the Charter capital by enlarging the nominal value or placing additional shares;
- 6) Decrease of the Charter capital by reducing the nominal value, purchasing shares to reduce their total amount as well as by redeeming shares acquired or paid-up by the Company;
- 7) Splitting and consolidation of the Company shares;
- 8) Decision-taking on the placement of bonds convertible into shares and other emissive securities convertible into shares;
- 9) Determination of the BoD membership, election of its members and early termination of their powers;
- 10) Election of the Audit Commission and early termination of their powers;
- 11) Approval of the Company’s auditor;
- 12) Decision-taking on transferring the powers of the sole executive body of the Company to a managing company (a managing director) and early termination of its powers;
- 13) Approval of annual reports and financials including profit and loss statements (profit and loss accounts) of the Company, as well as profit distribution (including dividend pay-out (declaration), except for the profit distributed as 3M, 6M and 9M dividends and losses as of the financial year;
- 14) Dividend pay-out (declaration) as of 3M, 6M and 9M results;
- 15) Determination of the procedure for arranging a GSM;
- 16) Decision-taking on approving transactions in cases envisaged by Article 83 of the Federal Law "On Joint-Stock Companies";
- 17) Decision-taking on approving major transactions in cases envisaged by Article 79 of the Federal Law "On Joint-Stock Companies";
- 18) Decision-taking on participation in financial and industrial groups, associations and other unions of commercial companies;
- 19) Approval of internal documents regulating the activities of the Company’s bodies;
- 20) Decision-taking on remuneration and/or compensations paid to the Audit Commission;
- 21) Decision-taking remuneration and/or compensations paid to the Board of Directors;
- 22) Decision-taking on other issues stipulated by the Federal Law "On Joint-Stock Companies".

Issues referred to the GSM competence shall not be passed over for resolution to the Board of Directors, Management Board and CEO. A GSM shall not be entitled to review or take decisions on the issues that are not referred to its competence by the Federal Law "On Joint-Stock Companies". A GSM resolution on an issue put for voting shall be adopted by the majority of votes of shareholders owning voting shares and taking part in a GSM unless otherwise stated by the Federal Law "On Joint-Stock Companies". A GSM resolution shall be adopted by the majority of three fourths of the shareholder votes owning voting shares and participating in a GSM on the following issues:

- Introduction of amendments and supplements to the Charter or approval of a new version of the Charter;
- The Company’s re-organization;
- The Company’s liquidation, appointment of a liquidation commission and approval of interim and final liquidation balance-sheets;
- Determination of quantity, nominal value, category (type) of authorized shares and the rights provided by the shares;
- Decrease of the Charter capital by reducing the nominal value;
- Placement of shares (emissive securities convertible into shares) by private offering upon a GSM resolution to increase the Charter capital by placing additional shares (to place the Company’s emissive securities convertible into shares);
- Open-subscription placement of common shares comprising more than 25 (twenty five) percent of the common shares placed earlier;
- Open-subscription placement of emissive securities convertible into common shares that can be converted into shares comprising more than 25 (twenty five) percent of the common shares placed earlier;
- Decision-taking on approval of major transactions covering property with the cost of more than 50 (fifty) percent of the asset book value;
- Other issues stipulated by the Federal Law "On Joint-Stock Companies"

A resolution on approval of an interested-party transaction, pursuant to Article 83 of the Federal Law "On Joint-Stock Companies" shall be adopted by a GSM by the majority of the shareholders, owners of voting shares, with no commercial interest in the transactions.

Resolutions on the issues stipulated by subitems 2, 5, 7, 8, 12-20, item 10.2, Art. 10 herein as well as on the reduction of the Charter capital by decreasing the nominal value, shall be adopted by a GSM only following the BoD proposal.

**The competence of the Issuer's BoD is stated in article 15 of the Charter:**

"The Board of Directors shall manage the Company, except for issues referred to the GSM competence by the Federal Law "On Joint-Stock Companies" and the present Charter.

The following issues shall pertain to the BoD reference:

- 1) 1) Definition of the Company's priorities and development strategy;
- 2) AGM and EGM convention, except for the cases specified in item 14.8., Article 14 hereof as well as announcement of the date for a new GSM instead of the abortive one, not held due to the lack of quorum;
- 3) Approval of the GSM agenda;
- 4) Election of a GSM secretary;
- 5) Determination of the date when the list of persons entitled to participate in the General Meeting is to be drawn up; approval of estimated expenses for GSM arrangement and other issues connected with its preparation and arrangement;
- 6) Proposal of issues, envisaged by subitems 2, 5, 7, 8, 12-20, item 10.2, Article 10 herein, for GSM's resolution as well as the issue on the Charter Capital reduction by reducing nominal value;
- 7) Placement of bonds and other securities, except for the cases outlined by the Russian legislation and present Charter;
- 8) Approval of Security Issue Resolution, the Prospectus and Issue Results Reports, Acquisition Results Reports, Redemption Results Reports, Buy-out Results Reports;
- 9) Evaluation (monetary value) of property, offering and buy-out price in cases envisaged by the Federal Law "On Joint-Stock Companies", as well as solving issues stipulated by subitems 11, 22, 38, item 15.1., Article 15 hereof;
- 10) Acquisition of the outstanding shares, bonds and other securities in cases stipulated by the Federal Law "On Joint-Stock Companies";
- 11) Alienation (sale) of the shares possessed by the Company as a result of purchase or buy-out as well as in other cases stipulated by the Federal Law "On Joint-Stock Companies";
- 12) Election of the CEO and early termination of the powers including decision-taking on the early termination of the labor contract;
- 13) Determination of the Management Board membership, election of MB members, determination of remuneration and compensations paid to them, early termination of their powers;
- 14) Recommendations to the GSM on remuneration and compensations paid to the Audit Commission members and Auditor's fee;
- 15) Recommendations on the dividend amount and payment procedure;
- 16) Approval of the Company's internal documents stipulating the procedure for Company's fund generation and usage;
- 17) Decision-taking on fund usage; approval of special-purpose fund cost estimates and review of cost estimate completion results;
- 18) Approval of the Company's internal documents, except for the documents which approval pertains to the GSM competence as well as other internal documents which approval pertains to the competence of executive bodies;
- 19) Approval of a business plan (updated business plan), including investment program and a quarterly report on their completion as well as the approval (adjustment) of the control indicators of the Company's cash flows;
- 20) Review of investment program, including amendments to it;
- 21) Establishment of branches and representative offices, their liquidation as well as introduction of amendments to the Charter concerning the establishment of branches and representative offices (including change of their names and location) and their liquidation;
- 22) Decision-taking on the participation in other companies (joining an existing organization or forming a new one including approval of founding documents) and the purchase, sale and encumbrance of the charter capital in companies in which the Company participates, change of the share to the charter capital of a corresponding company, withdrawal from other companies;
- 23) Definition of the Company's credit policy regarding granting of loans, conclusion of credit and loan agreements, provision of guarantees, acceptance of bill obligations (promissory notes and bills of exchange), property hypothecation and decision-taking on making the above-mentioned transactions in cases when decision tree is not outlined by the Company's credit policy, as well as decision-taking on adjustment of the Company's debt position to the limits, set forth by the Company's credit policy;
- 24) Approval of major transactions in cases set forth by Article X of the Federal Law "On Joint-Stock Companies";
- 25) Approval of transactions set forth by Article XI of the Federal Law "On Joint-Stock Companies";
- 26) Approval of the Company's Registrar, details of the contract and contract termination;
- 27) Election of the BoD Chairperson and early termination of the powers;
- 28) Election of the BoD Deputy Chairperson and early termination of the powers;
- 29) Election of the Corporate Secretary and early termination of the powers;
- 30) Preliminary approval of decisions regarding the Company's transactions connected with gratuitous transfer of the

Company property or title (demands) to itself or a third party; transactions involving discharge of property liability to itself or a third party; transactions connected with gratuitous rendering by the Company of the services to third parties in cases (amounts) determined by separate BoD resolutions and adoption of resolutions on transaction conclusion in cases where the above-stated cases (amounts) are left undetermined;

- 31) Decision-taking on the suspension of the powers possessed by a managing company (a managing director);
- 32) Decision-taking on the appointment of the Acting CEO, in cases determined by separate BoD resolutions, as well as bringing her/him to disciplinary liability;
- 33) Bringing the CEO and MB members to disciplinary liability or reward in accordance with the Russian labor legislation;
- 34) Review of CEO's reports on operations (including those relating to her/his performance), on implementation of GSM and BoD resolutions;
- 35) Approval of the interaction procedure between the Company and companies in which the Company has a stake;
- 36) Determination of the Company's (its representatives') position, including the instruction to vote or refrain from voting on agenda issues, to vote "FOR", "AGAINST", "ABSTAIN" on the following agenda issues of the SAC's GSM (except for the cases when SAC GSM functions are performed by the BoD) and BoD sessions (except for the issue on GSM agenda approval when functions of SAC GSM are performed by the BoD):
  - a) Determination of SAC GSM agenda;
  - b) Affiliate restructuring or liquidation;
  - c) Determination of the membership in management and control bodies of SACs, nomination, election of the members and pre-term termination of their powers, nomination and election of the sole executive bodies of SACs and pre-term termination of powers;
  - d) Definition of the membership of SAC management and control bodies, nomination, election of the members and pre-term termination of the powers, nomination, election and pre-term termination of the powers of the sole executive body;
  - e) Determination of amount, par value, category (type) of SAC's authorized shares and the rights vested by those shares;
  - f) Increase of the SAC's charter capital by increasing the nominal value or by placing additional shares;
  - g) Placement of SAC's securities convertible into common shares;
  - h) Splitting and consolidation of SAC's shares;
  - i) Approval of major transactions concluded by SACs;
  - j) SAC's participation in other companies (joining an existing company or establishment of a new company) as well as acquisition, alienation and encumbrance of shares and interests in the charter capital of companies where a SAC has a stake; change in participatory interest of relevant company;
  - k) Conclusion of transactions by a SAC (including multiple interrelated transactions) involving acquisition, alienation or eventual alienation of the property comprising the main assets, intangible assets, incomplete construction sites for the purpose of electricity/thermal energy generation, transmission, dispatching, and distribution in cases (amounts), determined by the interaction procedure between companies in which the Company participates, approved by the BoD;
  - l) Introduction of amendments and supplements to SAC's founding documents;
  - m) Determination of the procedure for SAC's BoD and AC members remuneration pay-out;
  - n) Approval of target key performance indicators (adjusted target key performance indicators);
  - o) Approval of a report on the completion of planned annual and quarter key performance indicators;
  - p) Approval of a business plan (an updated business plan), including investment program and a quarterly report on its execution;
  - q) Approval of a report on business plan completion;
  - r) Approval of profit and loss distribution based on the fiscal year-end results;
  - s) Recommendations for dividend amount and payout procedure;
  - t) Dividends payment (declaration) as of 1Q, 1H, 9M as well as fiscal year results;
  - u) Review of an investment program, including amendments to it;
  - v) Approval (review) of a report on investment program completion.
- 37) Determination of the Company's (its representatives') position on the following SAC BoD agenda issues (including the instruction to vote or refrain from voting on agenda issues or to vote "FOR", "AGAINST" or "ABSTAIN" on draft resolutions):
  - a) Determination of SAC representatives' positions on agenda issues of GSM and BoD of their SACs regarding conclusion (approval) of transactions (including multiple interrelated transactions) to involve acquisition, alienation or potential alienation of the property comprising the capital assets, intangible assets, incomplete construction projects for the purpose of electricity/thermal energy generation, transmission, distribution in cases (amount) determined by the interaction procedure between companies in which the Company participates, approved by the BoD;
  - b) Determination of SAC representatives' positions on agenda issues of GSM and BoD of their SACs that are involved in generation, transmission, dispatching, distribution and sale of electrical and thermal energy, regarding reorganization, liquidation, increase of the charter capital by increasing the nominal share value or by placing additional shares as well as offering securities convertible into common shares;
- 38) Preliminary approval of the Company's decisions on:
  - a) Transactions involving the Company's non-current assets exceeding 10% of the book value of the assets according to the data reflected in the financials as of the last reported date;
  - b) Transactions (including multiple interrelated transactions) involving acquisition, alienation or potential alienation of

property comprising the main assets, intangible assets, uncompleted construction objects for the purpose of electrical/thermal energy generation, transmission, dispatching, distribution in cases (amount) determined by special BoD resolutions;

c) Transactions (including multiple interrelated transactions) involving acquisition, alienation or potential alienation of property comprising the main assets, intangible assets, uncompleted construction objects for the purposes other than electrical/thermal energy generation, transmission, dispatching, distribution in cases (amount) determined by special BoD resolutions.

- 39) Nomination of candidates for election to the sole executive body, other management and control bodies, as well as auditor candidates at legal entities in which the Company participates and which are involved into electrical/thermal energy generation, transmission, dispatching, distribution and sales as well as maintenance and other service activity types;
- 40) Determination of directions for insurance coverage of the Company, including approval of a Company's underwriter;
- 41) Approval of the organization structure of the Company's Executive Office and introduction of amendments to it;
- 42) Approval of the Regulations on the CEO's financial stimulation, Regulations on financial stimulation of the Company's management; approval of the management list.
- 43) Approval of candidates nominated for several positions of the Company's Executive Office determined by the BoD;
- 44) Preliminary approval of the collective agreement, agreements concluded by the Company within the framework of regulating social and labor relations as well as approval of documents on state pension provision for the employees;
- 45) Creation of BoD committees, election of BoD committee members and pre-term termination of the powers possessed by the BoD Committee Chairpersons;
- 46) Approval of independent appraiser (-s) candidates for appraisal of shares, property and other Company assets in cases stipulated by the Federal Law "On Joint-Stock Companies", the present Charter and special BoD resolutions;
- 47) Approval of a financial advisor candidate, hired in accordance with the Federal Law "On Securities Market", as well as candidates for issue manager and advisors on transactions directly related to raising funds in the form of public borrowings;
- 48) Preliminary approval of transactions capable of entailing foreign cash commitments (or commitments with the values being attached to foreign cash) in cases and amount determined by special BoD resolutions as well as when the BoD has not determined the above-mentioned cases (amounts);
- 49) Approval of the Company's purchase policy, including the approval of the Regulations on the regulated purchase procedures, approval of the head of the central purchase body and its members, as well as approval of annual purchase program and decision-taking pursuant to the documents regulating purchase policy of the Company;
- 50) Decision-taking on the CEO nomination to government awards;
- 51) Approval of target (adjusted) key performance indicators (KPIs) and KPI completion reports;
- 52) Shaping the Company's policy aimed at enhancing the reliability of distribution grids and other network facilities, including approval of the Company's strategic programs to improve grids reliability, development and safety;
- 53) Shaping the Company's housing policy with regard to granting corporate support to employees to improve their living conditions by subsidies, expense compensations, interest-free loans and to taking decisions on the above-mentioned support in cases when support policy has not stipulated the support procedure;
- 54) Other issues referred to the BoD competence by the Federal Law, "On Joint-Stock Companies" and the present Charter.

Issues, referred to the BoD competence, shall not be passed over for consideration by the Company's CEO and Management Board.

Whilst exercising their rights and fulfilling duties, BoD members shall act to the benefit of the Company and shall perform their rights and duties in good faith and reasonably. BoD members shall be liable to the Company for the losses incurred by the Company through their wrongful acts (inaction) unless federal laws defined other grounds and scope of liability. In this respect, no liability will be incurred by the BoD members who voted against the resolution which resulted in Company losses or who abstained from voting.”.

#### **The Management Board's competence is stated in Article 22 of the Charter:**

“The MB competence shall include:

- 1) Elaboration and submission of the Company's development strategy for the BoD's review;
- 2) Preparation of the annual (quarter) business plan, including the investment program and a completion report, approval (adjustment ) of cash flows (budget) of the Company;
- 3) Preparation of the Company's annual report on financial and economic operations as well as on the execution of GSM- and BoD-approved decisions by the MB;
- 4) Review of reports, prepared by the CEO's deputies, heads of separate subdivisions, on the results of approved plans, programs, instructions as well as review of reports, documents and other information about operation of the Company and its SACs;
- 5) Decision-taking on the issues referred to the competence of the supreme authorities of the companies where the Company possesses 100 (One hundred) percent of the charter capital (taking into account subitem 36, 37 item 15.1., Article 15 hereof);

- 6) Preparation and submission of financial and economic reports of the companies where the Company possesses 100 (One hundred) percent of the charter capital for a BoD review;
- 7) Decision-taking on conclusion of major transactions (property, work and services which cost amounts to 1 up to 25 percent of the Company's assets book value, determined as of the date of taking a decision to conclude such a transaction (except for the cases specified in subitem 38, item 15.1 hereof);
- 8) Decision-taking on other issues according to decisions adopted by the GSM, BoD as well as issues submitted by the CEO for MB's review.

MB members shall be elected by the BoD, determined by a BoD resolution upon CEO's proposal. If the BoD declines candidates to the MB, promoted by the CEO, the BoD shall be entitled to nominate candidates promoted by the BoD member (-s). The MB membership shall not be less than 3 (Three) persons. The MB shall reach the quorum if more than half of its elected members participate in the session (absentee voting). All resolutions shall be adopted by the majority of votes belonging to the MB members present at a session (or participating in the absentee voting). In case of a tied ballot, the decisive vote shall be cast by the MB Chairperson."

**The CEO's competence is stated in article 23 of the Charter:**

"The CEO's competence shall include all matters of day-to-day management of the Company, except for issues referred to the GSM, BoD and MB competence. The CEO shall act without the power of attorney, on behalf of the Company, including the restrictions stipulated by the Russian legislation, the present Charter and BoD resolutions:

Ensuring fulfillment of the Company's plans required for reaching its objectives;

- Arranging accounting and reporting operations;
- Administering the Company's property, concluding transactions on behalf of the Company, issuing powers of attorney, opening the clearing and other accounts at banks, other credit institutions (and also in cases stipulated by the legislation - at organizations being professional participants of securities market);
- Issuing decrees, approving (adopting) instructions, internal regulations and other internal documents of the Company regarding her/his competence; giving instructions obligatory for execution by all Company employees;
- Approving the Regulations on the branches and representative offices;
- Approving staff schedule and official salaries according to the organization structure of the Company's executive office;
- Exercising rights and liabilities of the employer regarding the Company's employees as stipulated by the labor legislation;
- Performing the functions of the MB Chairperson;
- Distributing responsibility between the CEO deputies;
- Submitting reports on financial and business operations of the subsidiary and associated companies, whose shares are owned by the Company as well as information on other companies where Company has a stake for a BoD's review, except for the cases described in subitem 6, item 22.2 Article 22 hereof;
- Within 45 (Forty five) days prior to the AGM date, submitting annual report and financial statements, profit and loss statement as well as distribution of profits and losses for a BoD's review;
  - Considering other issues of the Company's activity, except for the issues related to the GSM, BoD or MB competence.

The CEO of the Company shall be elected by the majority of votes cast by the BoD members participating in the session. Nomination of candidates for the CEO position for further election by the BoD shall comply with the procedure determined by the internal document regulating the procedure for convention and arrangement of the BoD sessions".

Protocol date: **25.12.2007**

Protocol number: *1795pr/9*

### **8.1.3. Information on formation and usage of the reserve fund as well as other funds of the Issuer**

As of the reported quarter

Information on formation and usage of the reserve fund as well as other funds of the Issuer being formed by its net profit  
Fund: **Reserve**

Amount of fund set forth by the founding documents: **5% from the Charter capital**

Fund in money terms as of the end of the reported period, RUR: **96 121**

Fund amount in % from the Charter capital: **1.099**

Contributions during the reported period: **0**

Money used from the fund during the reported period: **0**

Directions for fund usage: **The reserve fund was not used.**

### **8.1.4. Information of the procedure for convention and arrangement of the supreme managing body meeting**

Name of supreme managing body of the Issuer: **General shareholder meeting**

Procedure of notifying shareholders on the meeting of the supreme body of the Issuer:

*In case of arranging general shareholder meeting in the form of meeting (compresence):*

A GSM announcement shall be published by the Company in the Rossiyskaya Gazeta as well as be disclosed at the corporate website within 30 (thirty) days prior to its date.

Voting papers concerning agenda issues shall be forwarded by registered mail to address disclosed in the register or handed over to every person disclosed in the register against signature within 20 (twenty) days prior to a GSM.

*In case when a general shareholder meeting is arranged in the form of absentee voting:*

The announcement on a GSM, held by means of absentee ballot, shall be published by the Company in the Rossiyskaya Gazeta as well as on the corporate website within 30 (thirty) days prior to the Company's deadline for the receipt of voting papers.

Voting papers on the agenda issues shall be sent by registered mail to addresses stipulated by the list of the persons authorized to participate in a GSM or shall be submitted to such persons against signature within 20 (Twenty) days prior to the Company's deadline for the receipt of voting papers.

Persons (bodies), entitled to convene (demand arrangement of) extraordinary meeting of the Issuer's managing body as well as the procedure of forwarding such demands:

An EGM shall be arranged upon a BoD decision, based upon its own initiative, a request from the Audit Commission and the Auditor as well as a shareholder (shareholders) possessing at least 10 (ten) percent of voting shares of the Company as of the request date.

An EGM, held according to a request from the Audit Commission and the Auditor as well as a shareholder (shareholders) possessing at least 10 (Ten) percent of voting shares, shall be arranged by the Board of Directors.

Such GSM shall be held within 40 (Forty) days since submission of a GSM request, except for the case specified in item 14.9. hereof.

This GSM request shall contain issues to be included onto the agenda.

A person (persons), requesting an EGM convention, shall be entitled to submit a draft EGM resolution as well as a proposal on an EGM form. In case this EGM convention request contains a nominee promotion proposal, this proposal shall be regulated by the corresponding statements of Article 13 hereof.

The Board of Directors shall not be entitled to change the wording of EGM agenda issues, issue resolutions and proposed form for an EGM convened upon the request from the Audit Commission, the Auditor as well as a shareholder (shareholders) possessing at least 10 (Ten) percent of voting shares.

In case an EGM convention is requested by a shareholder (shareholders), such request shall contain the name of a shareholder (shareholders) who demand the meeting as well as the quantity and category (type) of the Company shares possessed by them.

An EGM convention request shall be signed by a person (persons) requesting the EGM convention.

The procedure for determining a date for the meeting of the Company's supreme governing body:  
An AGM shall be held not earlier than two months and not later than six months following the end of the financial year.

An EGM, held according to a request from the Audit Commission and the Auditor as well as a shareholder (shareholders) possessing at least 10 (Ten) percent of voting shares, shall be arranged by the Board of Directors.

Such general shareholder meeting shall also be held within 40 (Forty) days since the demand, except for the case when the proposed agenda of the EGM contains an issue on election of the Company's Board of Directors.

*In case when a proposed agenda of an EGM contains an issue on election of the Company's BoD:*

A GSM should be held within 90 (Ninety) days since a demand on convening an EGM.

Shareholders (shareholder) of the Company owning no less than 2% of voting shares on the whole shall be entitled to propose candidates for election to the Company's BoD. The number cannot exceed the membership of the Company's BoD.

Such proposals should be submitted to the Company in no less than 30 (Thirty) days prior to the date for holding an EGM.

The Company's BoD is obliged to review the submitted proposals and take a decision to include them onto the agenda of an EGM or to refuse the inclusion within 5 (Five) days following the end of the term disclosed in paragraph 2 of the present subitem.

The date for compiling the list of persons entitled to participate in a general shareholder meeting cannot be determined earlier than the date of decision-taking on holding a general shareholder meeting and more than 85 (Eighty five) days prior to a general shareholder meeting.

A message on holding an EGM should be disclosed within 70 (Seventy) days prior to the date.

Persons that are entitled to introduce proposals into meeting agenda of the supreme governing body as well as the procedure for introducing such proposals:

Shareholders (shareholder) owning no less than 2% of voting shares within 60 (Sixty) days since the end of financial year are entitled to introduce issues onto the agenda of AGM and nominate candidates for BoD, Audit Commission. The number of the candidates cannot exceed the membership of the corresponding body.

Persons that are entitled to get acquainted with the information (materials) submitted for arranging a meeting of the supreme governing body of the Issuer as well as the procedure of get acquainted with the information (materials): ***Information (materials) on the agenda issues within 20 (Twenty) days, in case of a general shareholder meeting which agenda contains an issue on restructuring of the Company, should be available within 30 (Thirty) days prior to a GSM to persons entitled to participate in a GSM for study in premises of the Executive office of the Issuer and other places disclosed in a message on a GSM. This information (materials) should be available to persons participating in GSM during it.***

***An information reviewing procedure for persons entitled to participate in general shareholder meeting as well as the list of such information is determined by a resolution taken by the Company's Board of Directors.***

A procedure for announcing resolutions taken by the supreme governing body as well as voting results:

*In case when general shareholder meeting is held in the form of meeting (compresence):*

Voting results and resolutions taken by the Company's GSM can be announced on the Company's GSM.

In case when voting results and resolutions adopted by the Company's GSM were not announced on the GSM, within 10 (Ten) days since compilation of the protocol on the voting results resolutions taken by the Company's GSM as well as voting results are published in the "Rosyiskaya Gazeta" as well as on the corporate web-site.

*In case of holding a GSM in the form of absentee voting:*

Resolutions taken by the GSM as well as voting results in the form of Voting results report within 10 (Ten) days since compilation of the voting results protocol are published in the "Rosyiskaya Gazeta" as well as on the corporate web-site.

***Conversion of documentary interest-bearing non-convertible bearer bonds of series 01 with centralized obligatory custody of OAO "Permenergo", state registration 4-01-00118-A dd. 17.04.2007, into the bonds of the present issue.***

Placement price

Price and procedure for price determination: *RUR 1000*

Prerogative right

Procedure for executing prerogative right of purchasing the placed securities:

Terms and procedure of payment for securities. Share, non-placement of which the issue (additional issue), is considered invalid as well as procedure for returning money paid for the securities (or additional issue), in case it is acknowledged invalid.

Procedure and terms of the securities redemption

Redemption is done by a Payment agent for and on behalf of the Issuer. Bond redemption is done in Russian currency in non-cash procedure to parties entitled to obtain redemption. Discharge of liabilities on bond redemption is done according to the list of bondholders and/or nominal holders in NDC. Bond redemption is paid to bondholders being bondholders as of the end of operating day in NDC, preceding 6th working day prior to redemption date. Discharge of liabilities to a bondholder from the list of holders and/or nominal holders is acknowledged proper, including when the bonds are alienated following the date of compilation of the list. It is presumed that nominal holders are authorized to obtain redemption. Redemption is also accompanied by coupon yield as of the last coupon period. If the redemption date falls on weekend, despite be it state holiday or weekend for accounting operations, the sum is paid out on the first working day preceding the weekend. A bondholder is not entitled to demand interest accrual or other compensation for such payment delays. Writing off during redemption is done following discharge of all liabilities to bondholders on yield and nominal value payments. The certificate is discharged following the writing of all bonds from DEPO accounts in NDC.

Interest (coupon) yield, procedure and terms of payments:

#### **Coupon yield on bonds**

Coupon period is 182 days.

First coupon interest rate is 8.15% per annum, the rate is determined by contest held by ZAO "SE MICEX" among potential bond purchasers of OAO "Permenergo" (state registration number: *4-01-00118-A dd. 17.04.2007*) on May 29, 2007 at starting date of placement.

According to the Issuer's resolution, interest rates on 2<sup>nd</sup>, 3<sup>rd</sup>, 4<sup>th</sup>, 5<sup>th</sup>, 6<sup>th</sup> coupons are equal to 1<sup>st</sup> coupon rate.

<b>Coupon end date</b>	<b>Coupon rate, % per annum</b>
27.11.2007	8.15
27.05.2008	8.15
25.11.2008	8.15

26.05.2009	8.15
24.11.2009	8.15
25.05.2010	8.15
23.11.2010	The rate is determined by the Issuer
24.05.2011	The rate is determined by the Issuer
22.11.2011	The rate is determined by the Issuer
22.05.2012	The rate is determined by the Issuer

Interest coupon rates which amount was not determined by the Issuer prior to bond placement ( $i=(j+1), \dots, 10$ ), is determined by the Issuer numerically following state registration of Placement report on a day of determining  $i^{\text{th}}$  coupon which occurs no later than 10 (Ten) calendar days prior to payment ( $(i-1)^{\text{th}}$  coupon). The Issuer is entitled to determine also any coupons following  $i^{\text{th}}$  coupon on a day of  $i^{\text{th}}$  coupon determination ( $k$  – last of determined coupons).

Payment on any coupon per bond is calculated as follows:

$$K(j) = C(j) * N * (T(j) - T(j-1)) / 365 / 100 \%$$

$j$  – index number of coupon period,  $j=1-10$ ;

$K(j)$  – coupon payment on each bond;

$N$  – nominal value of a bond (RUR);

$C(j)$  – interest rate on  $j^{\text{th}}$  coupon;

$T(j-1)$  – starting date of  $j^{\text{th}}$  coupon period;

$T(j)$  – end date of  $j^{\text{th}}$  coupon period.

### Terms and procedure for yield payment

**Bonds as well as yield payment are direct absolute liabilities of the Issuer. Coupon is paid by a Payment agent for and on behalf of the Issuer. If the coupon end date falls on weekend, despite be it state holiday or weekend for accounting operations, the sum is paid out on the first working day preceding the weekend. A bondholder is not entitled to demand interest accrual or other compensation for such payment delays. Coupon yield is paid in Russian currency in non-cash procedure to parties entitled to obtain redemption. It is presumed that nominal holders are authorized to obtain redemption. Discharge of liabilities is done on the basis of the list of holders and/ or nominal holders submitted by NDC.**

Information on guarantees: *The issue is provided by guarantee. The pledger is Open Joint-Stock Company Sverdlovenergozhystroy.*

### 8.3.3. Information on issues when the Issuer failed to discharge its liabilities (default)

*There are no such issues*

### 8.4. Information on the pledger

State registration bond issue number: **4-01-32501-D**

Information on the pledger

Full company name: **Open Joint-Stock Company Sverdlovenergozhystroy**

Short company name: **Sverdlovenergozhystroy, OAO**

Location: **26 Turgeneva Ulitsa, Ekaterinburg, Russia, 620075**

TIN: **6671111479**

PSRN: **1026605241926**

### 8.5. Terms ensuring bond liabilities discharge

According to the guarantee agreement (the text of the agreement is in Appendix#2 to the Issue Resolution and Appendix#10 to the Prospectus) the pledger is obliged to:

1. Be in charge of default and/or improper discharge of liabilities on payment of nominal value as well as overall coupon yield determined according to the Issue Resolution and Prospectus (item 1.3. of the guarantee agreement).

2. Be in charge of default and/or improper discharge of the Issuer's liabilities on bond acquisition in procedures, terms and conditions stated in the Issue Resolution and Prospectus (item 1.4. of the guarantee agreement).

The Pledger also ensures discharge of the Issuer's liabilities on early payment of nominal value and/ or coupon yield as of the corresponding period which shall occur as a result of resolution on liquidation or bankruptcy taken by the Issuer's managing bodies or state authorities, in case of decision-taking on restructuring as well as payment when the bond issue is acknowledged invalid (item 1.7. of the guarantee agreement).

The Pledger is equally responsible for default and/ or improper discharge of liabilities stated in items 1.3., 1.4. and 1.7 (item 1.8. of the guarantee agreement). The Pledger is not responsible for reimbursement of legal expenses for debt collec-

tion and other losses of holders caused by default or improper discharge of liability to pay nominal value and/ or coupon yield (item 1.6. of the guarantee agreement).

**Amount of guarantee:**

Extent of liability for default and/or improper discharge of liabilities is limited to RUR 1 000 000 000. (series 01 bonds) and RUR 600 000 000 (series 02 bonds) as well as total coupon yield on the bond issues (1 000 000 bonds and 600 000 bonds correspondingly).

Extent of liability for default and/or improper discharge of liabilities stated in 1.4. of the guarantee agreement is set as equal to overall sum of default and/or improperly discharged Issuer's liabilities on bond acquisition in a procedure, terms and conditions stipulated by the Issue Resolution and Prospectus.

Extent of liabilities for default and/or improper discharge of liabilities stated in item 1.7 of the guarantee agreement is set as equal to overall sum of default and/or improperly discharged Issuer's liabilities on pre-term payment of nominal value and/or coupon yield as of the corresponding period which may occur as a result of resolutions taken by the Issuer's managing bodies or state authorities on liquidation or bankruptcy when the Issuer's managing bodies take a resolution on restructuring as well as bond payment when the bond issue is acknowledged invalid.

**Terms of guarantee and procedure for execution of bondholder rights on the provided guarantee:**

If on the date when, according to the Issue Resolution and Prospectus, the Issue is obliged to pay to the bondholders or on the date of pre-term discharge, stipulated by item 1.7. of the guarantee agreement, or on the date, when, according to the Issue Resolution and Prospectus, the Issue is obliged to redeem the bonds presented by the holders (hereinafter referred to as the Purchase date), the holder has not received his money from the Issuer in full, s/he is entitled to forward a written request for the money directly to the Guarantor (hereinafter referred to as a Request to the Guarantor). The Guarantor is entitled to refuse to fulfill the request in case the holder violated statements stipulated by items 3.1., 3.2., 3.3. or 8.3 of the guarantee agreement or in a case stipulated by item 6.2. of the Requests for payment prepared in accordance with sub-items 3.2 and 3.3 of the guarantee agreement, cannot be forwarded to the Guarantor following 90 (Ninety) days since the date when the Issue was obliged to pay the nominal value and/or coupon yield or to purchase the bonds according to the Issue Resolution and Prospectus. The Guarantor transfers the sums to the account provided by the holder in the request within 15 (Fifteen) working days since the receipt of the request.

Type of guarantee (pledge, guarantee, bank guarantee, federal or municipal guarantee, other).

Pledged bonds should contain:

subject of the pledge:

for securities being subject of the pledge, - type, category, series (if exists), the name of the issuer, form, state registration number and issue registration date, registering body, nominal value (in case, according to the Russian legislation, the securities have a nominal value), number of securities, other obligatory requisites set forth by the Russian legislation, number of securities, holder rights, information on name, location and mailing address and telephone of the registrar or depositary registering rights for the securities, information on pledge date fixed in the register, in case the securities are payable on demand and with obligatory centralized custody – in the right registering system of the depositary, information on any significant encumbrances on the securities;

for immovable property being subject of the pledge – pledger's right for the property (ownership or economic jurisdiction), # of ownership certificate, issue date and issuing authority, cadastral number of an object or indication on absence of cadastral number and reasons, registration number in Unified State Register of Immovable Property Rights and Transactions, state registration date or indication that there were no state registration of ownership or economic jurisdiction and reasons, registration number (in favor of bondholders), pledge state registration date type and location of the pledged property (usage sphere, total and active area, year of construction, in case of reconstruction or repair – year of last reconstruction or repair), information on any existing encumbrances on the property (including information on encumbrance registration); price of the property; price of the property according to appraisal prepared by the appraiser, date, name, license, location, mailing address, contact telephone indicated; volume of requests submitted by the holders (pay-out of nominal value (other property equivalent), pay-out of interest (coupon) yield, other property rights); information on pledge insurance (name of the underwriter, insurer and payee, location, insurance sum, description of insurance event, terms of insurance contract and signing date), in case it was held; the procedure for levying execution on subject of the pledge; other pledge conditions.

Guarantee bonds should contain:

The volume which the issuer should pay to the holders in case of default or improper discharge (pay-out of nominal value (other property equivalent), pay-out of interest (coupon) yield, other property rights); the procedure for submission of requests to the guarantor. In case the guarantee is provided by a legal entity, the following information should be included: net asset value as of the last reported date prior to provision of guarantee; amount of net asset value of a legal entity providing guarantee as of the last reported date prior to the guarantee; amount of net asset value of a legal entity providing guarantee as of the end of the reported period.

For bank-guarantee bonds:

Date of bank guarantee; bank guarantee sum; contents of bank guarantee; terms; procedure for requests submission; other significant conditions of bank guarantee.

For bonds with federal or municipal guarantees:

Authority that took a decision to guarantee discharge of obligations on behalf of Russia (RF subject, municipal subject)

bond obligations and date of the decision; information on the guarantor, including its name (Russia, RF subject or municipal subject) and name of the body that issued a guarantee from the guarantor; guarantee date; obligation volume; guarantee terms; procedure for request submission; other guarantee conditions

### **8.5.1. Terms for ensuring discharge of liabilities on bonds with mortgage coverage**

**The Issuer did not place bonds with mortgage coverage which liabilities are not discharged yet**

### **8.6. Information on companies registering rights for the Issuer's securities**

Entity that keeps register of the Issuer's security holders: *registrar*

Information on registrar

Full company name: *Open Joint-Stock Company Central Moscow Depository*

### **8.7. Information on legislation regulating import and export of capital and able to influence dividend and interest payments as well as other payments to non-residents**

The list of legal acts on dividends, including those that regulate payments to non-residents:

1. Civil Code of the Russian Federation (part 1) dated 30.11.1994, #51-FZ;
2. Tax Code of the Russian Federation (part 1) dated 31.07.1998 #146-FZ (articles 11, 45);
3. Tax Code of the Russian Federation (part 2) dated 05.08.2000 #117-FZ (Articles 207, 208, 215, 224, 284, 310, 312);
4. Federal Law dated 26.12.1995 #208-FZ "On Joint-Stock Companies" (articles 42, 43);
5. Federal Law dated 22.04.1996 #39-FZ "On securities market";
6. Federal Law dated 05.03.1999 #46-FZ "On protection of rights and legitimate interests of investors on securities market";
7. Federal Law dated 25.07.2002 #115-FZ "On legal status of foreigners in Russia";
8. Federal Law dated 26.10.2002 #127-FZ "On bankruptcy";
9. Federal Law dated 10.12.2003 #173-FZ "On currency regulation and control";
10. Federal Law dated 07.08.2001 #115-FZ "On anti-money laundering and terrorism financing";
11. Decree of FSC of Russia dated 02.10.1997 #27 "On approval of the Regulations on keeping register of securities holders";
12. Decree of Superior Commercial Court Plenum of Russia dated 18.11.2003 #19 "On several issues of applying Federal Law "On Joint-Stock Companies" (item 15).
13. Intergovernmental agreements on evading double taxation (with regard to income and property taxes as well as on prevention of income and property tax evasion).

### **8.8. Taxation of yield on the Issuer's securities**

Taxation of yield derived from the Issuer's securities is governed by the Tax Code of the Russian Federation and other legislative Acts adopted in accordance with the Tax Code.

## **TAX RATES**

Type of yield	Legal Entities		Natural Persons	
	Residents	Non-residents	Residents	Non-residents
Yield from security sale	24% (including Federal budget - 6,5%; regional budget - 17,5%)	20%	13%	30%
Dividend yield	9%	15%	9%	15%

### **TAXATION OF NATURAL PERSONS**

Type of tax – yield tax

Yield gained from resources in Russia includes:

— Dividends and interest received from Russian company as well as interest received from private entrepreneurs and (or) foreign company regarding its representative office in Russia;

– Revenues from sale of shares or other securities as well as participation shares in the Charter capital of companies  
– Tax base.

– Taxpayer income received as a material gain is a material gain received from purchase of securities. Tax base is determined as an excess of market value defined with regard to ultimate limits of market price fluctuations over real expenses for acquisition of the securities. The procedure for determining market price and ultimate limits of security price fluctuations is set by a federal body regulating the security market.

– The following revenues are used when determining tax base on revenues from operations with securities:

7) Purchase and sale of securities circulating on organized security market;

8) Purchase and sale of securities not circulating on organized security market.

Revenue (loss) on purchase and sale of securities is determined by difference between revenues obtained from security sale and documented expenses on acquisition, keeping and sale of securities incurred by the taxpayer or deductions acknowledged for reduction of revenues from purchase and sale.

Such expenses include:

money paid to the seller according to the agreement;

payment for depositary services;

fees to professional participants, discount paid to managing company of a mutual fund while selling investment unit determined in accordance with the procedure stipulated by Russian legislation on investment funds;

exchange fees;

payment for registrar services;

other expenses directly connected to sale, purchase and custody of securities spent on services rendered by professional participants.

Revenue (loss) from security purchase-sale circulating on organized security market is decreased (increased) by interest paid for using money taken for the transaction within the sums calculated from the current refinancing rate of the Central Bank.

Loss on operations with securities circulating on organized market is determined given the ultimate fluctuation limits of market prices.

Shares that circulate on organized market are securities listed by trade institutions owning license issued by the federal body regulating security market.

Market quotation of a security circulating on organized market is an average weighted price on transactions settled during trade day by a trade institution. If a security was traded with the use of two or more trade institutions a taxpayer is entitled to independently choose market quotation from any of the trade institution. If a trade institution does not calculate average weighted price, it is calculated as a half of maximum and minimum price of transactions effected during the trading day at this trade institution.

If taxpayer's expenses on acquisition, sale and custody cannot be charged as expenses on acquisition, sale and custody, these expenses are distributed proportionally to cost estimate of securities regarding the expenses. The cost estimate is calculated as of the expense date.

Loss on security transactions circulating on organized market obtained as a result of such operations decreases tax base on purchase-sale of securities of such category.

Revenue from purchasing and sale of securities not circulating on organized market which met demands set for organized market securities at the moment of acquisition can be reduced by a loss obtained during the tax period on purchasing and sale of organized market securities.

Date of real revenue:

day for revenue payment, including transfer of revenue to taxpayer's bank accounts or by his order to third parties' accounts – when obtaining revenues in money form;

day of security purchase.

Tax base on is determined at the end of tax period. Calculation and tax payment is done by tax agent at the end of tax period or revenue payment to taxpayer prior to regular tax period.

When a tax agent pays money prior to the end of regular tax period the tax is paid out of a revenue share equaling real money that were paid out. Revenue share is determined as a multiplication of overall revenue and paid sum and cost

estimate ratio determined at the money payment date by the tax agent acting as a broker. If there is more than one payment during a tax period, tax is calculated by accrued method taking into account tax paid out earlier

Cost estimate is determined on the basis of real and documented expenses on acquisition.

Money payment is payment of cash, transfer of money to bank account of a natural person or third party's on his order.

If it is impossible to deduct tax from taxpayer, a tax agent (broker, trustee or other person effecting operations to the benefit of a taxpayer) within 1 month since occurrence of this circumstance notifies tax authority in a written form on impossibility of such deduction and taxpayer's debt. In this case the tax is paid according to Article 228 of Tax Code.

Type of tax – income tax.

The revenues include:

Revenues from sale;

Extraordinary revenues, including interest on securities and other debt liabilities and/ or share in other companies.

Tax base.

Revenues from sale are determined on the basis of sale price.

Expenses on sale are determined on the basis of acquisition price (including expenses on its acquisition), expenses on sale, discounts from cost estimate of investment units.

Securities are acknowledged as organized market securities only when the following requirements are simultaneously observed:

1) if they are admitted for trading by at least one trading institution that has such a right in accordance with the domestic legislation;

2) if information on prices (quotations) is published in mass media (including e-media) or may be submitted to any interested party by trade institution or another authorized entity within 3 years following the operations;

3) if a market quotation can be calculated as it is stipulated in domestic legislation.

Market share of organized market securities for taxation is a real sale price if this price is between minimal and maximum price (price interval) for the security registered by trading institution as of the transaction date. In case of sale of organized market securities at the price lower than minimal price of transaction on organized market, minimal price will be used in determining financial result.

With regard to securities, not traded on organized markets, real sale price is taken for taxation when any of the following requirements are met:

1) if real price of the corresponding transaction is between prices for similar security registered by trading institution as of transaction date or date of nearest trading occurred prior to the corresponding transaction, if there were transactions with the security at least once within the last 12 months;

2) if fluctuation of real price is within 20% increase or decrease from average weighted price for a similar security calculated by trade institution in accordance with the rules as of the transaction date or nearest trading occurred prior to transaction date if there were transactions with the security at least once within the last 12 months.

Tax base is determined separately by a taxpayer except for the tax base determined by professional participants. Herewith, taxpayers (except for professional participants rendering dealer services) determine tax base with organized market securities separately from the tax base on securities not circulating on organized market.

When selling or other alienation of securities a taxpayer independently chooses one of the following writing-off methods according to accounting policy:

1) FIFO;

2) LIFO;

3) by unit cost.

According to the Issuer's accounting policy expenses on cost of withdrawal is written-off by unit cost.

Taxpayers that received loss (losses) from operations with securities in preceding tax period or preceding tax period are entitled to decrease tax base obtained from operations with securities in reported (tax) period (to transfer losses to future) according to Article 283 of Tax Code.

Herewith, losses from operations with securities not circulating on organized market received in the previous tax period (previous tax periods) can decrease tax base from operations with such securities determined in the reported (tax) period. Losses from operations with organized market securities received on the previous tax period (previous tax periods) can reduce tax base from operations on sale of such securities.

During tax period transfer of losses to the future that were incurred in the corresponding tax period from operations with organized market securities and securities not circulating on the organized market is done separately on these security categories within income from operations with such securities.

In case a tax agent pays revenues to a foreign company which, according to international treaties (agreements) are taxed in Russia at low rates, calculation and deduction of tax is done by a tax agent according to low rates if a foreign company submits to a tax agent a confirmation stated by item 1, Article 312 of the Russian Tax Code.

Applying statements disclosed in international treaties of the Russian Federation a foreign company should submit to a tax agent a confirmation that this foreign company is located in a country that has a tax treaty with the Russian Federation that should be assured by competent authority of the correspondent country. In case this confirmation is in a foreign language, a tax agent is also provided with a Russian copy.

By submitting a confirmation to a tax agent paying out revenues (regarding which there is a international treaty of Russia on favorable taxation) prior to the payment date a foreign company with a right to revenues receives tax remissions by a payment agent or taxation at reduced rates.

Taxes deducted from revenues received by foreign companies are transferred by a tax agent to the federal budget simultaneously with paying out the revenues in foreign currency or Russian rubles according official rates of the Russian Central Bank as of the tax deduction date.

## 8.9. Information on declared and paid dividends on the Issuer's shares as well as bond yield

### 8.9.1. Information on declared and paid dividends on the Issuer's shares as of the last 5 completed financial years or as of each completed financial year if the Issuer operates less than 5 years

Coupon yield per a bond: *RUR 40.64.*

Coupon yield of the bond issue: *RUR 66 568.32.*

Term for payment: *26.11.2009*

#### **Form and procedure of yield payment:**

*The procedure of bond redemption on the creditor's demand was approved by the Issuer and on February 06, 2008 it was forwarded to the bondholders recorded as of the date when a decision on restructuring in the form of merger to OAO "IDGC of Urals" was taken by the Company's EGM, i.e. as of January 18, 2008. The notification was also disclosed on the corporate web-site and periodicals ("State Registration Mercury").*

*To execute the right for pre-term redemption a bondholder - a NDC bailor or nominal holder - a NDC bailor - authorized by a bondholder for activities regarding pre-term redemption submits an application to the Company.*

*The Company accepts the creditors' demands within 30 days since submittal of notification on resolution on restructuring in the form of merger to bondholders or within 30 days since public disclosure of the message on the resolution in periodicals ("State Registration Mercury").*

*The documents submitted according to the present Procedure are reviewed by the Company and NDC within 15 days since the receipt by the Company.*

*After the Company reviewed the documents, the Company forwards a written notification on the results of application review to a bondholder, namely:*

- Notification on allowance of application or notification on refusal, reasons for refusal and comments to the documents included.*

*In case the comments can be resolved a bondholder submits to the Company a range of documents subject to re-examination by the Company within 15 working days since the receipt.*

*Demands on pre-term redemption are to be satisfied until April 15, 2008, but no earlier than the date when the Company submitted an application to the creditor.*

*Demands are to be satisfied by paying out nominal value of RUR 1 000 per bond as well as coupon yield (as of the date of money transfer from the Company's bank account). After settlements with creditors NDC writes off bought-out bonds from the DEPO-account of bondholders to the Issuer account.*

Type of yield: **nominal value, redemption of bonds on the creditors' demand due to the Issuer's restructuring**  
Form and procedure for yield payment:

*Redemption date on the holders' demands submitted during the redemption period is determined as 2<sup>nd</sup> working day of i<sup>th</sup> coupon period.*

*The bonds are redeemed on the creditors' demand according to the following procedures:*

*a) a bondholder concludes a contract with any broker being a trade exchange participant and submits an instruction to take measures to sell bonds to the Issuer. A bondholder being a trade exchange participant acts independently. Trade participant acting for and on behalf of bondholder or at his own expense hereinafter is referred to as a Holder or a Bondholder;*

*b) During submission period a Holder should forward to the Issuer's agent a written notification on intention to sell a certain amount of bonds (hereinafter referred to as the Notification). The notification should be signed by the authorized person of a Holder. The Issuer redeems bonds on the creditor's demand according to the rules of exchange.*

*In case of exchange restructuring or liquidation or in case when such redemption using exchanges as is stated in the Issue Resolution and Prospectus does not correspond with the Russian legislation, the Issuer decides on the trade institution using which the Issuer will conclude transactions for redemption. In this case, the bonds will be redeemed according to the legal documents regulating such trade institutions. The Issuer also should publish information on the trade institution used for transactions alongside with the message on coupon rate determination.*

Redemption price:

*100% from the par value of the bond issue. The Issuer also pays coupon yield calculated according to the present Issue Resolution and Prospectus as of the redemption date. Bonds are paid in monetary form, non-cash settlement, in Russian currency according to the exchange rules.*

*c) Transactions on redemption are settled through the Issuer's agent in the trading system of the exchange according to*

*the rules of the exchange.*

*The redeemed bonds can be re-issued in future and can circulate on trading market until the end of redemption (in case the Issuer complies with the Russian legislation).*

Term for payment: **16.05.2008**

Number of bonds redeemed: **600 000**
